ignition	automatic electronic
safety	flame failure device (FFD) fitted to each burner
gas input	set for natural gas — regulator supplied adaptable for ULPG — no regulator required
accessories	Canali design control knobs
warranty	two years parts and labour

SPACIOUS DESIGN

This wide 60cm hob offers four burners ergonomically positioned for maximum benefit with the possibility of several styles of cooking at the one time.

ULTRA-RAPID BURNER

This large and versatile burner suits the larger stock pots, boilers, saucepans and griddles.

ELECTRONIC IGNITION

The cooktop is connected with a power cord of 1.3 metre length to be plugged into a GPO located according to installation needs below the benchline. This supplies a continuous stored charge to spark the gas supply to the individual burner of your choice.

FLAME FAILURE DEVICE

A flame failure device is fitted to all four burners. The FFD ensures that should a flame be extinguished prematurely (for instance, by smothering or a sudden air gust) the gas supply to the specific burner(s) is stopped. For absolute safety, the burner(s) can only be reignited by physically resetting the control knob(s) to the OFF position and then following normal ignition procedure. Simply depress and turn the control of the desired cooking zone for almost instant flame ignition.

LOW MAINTENANCE

The seamless hob design allows for easy wipe-over cleaning. The control knobs, also, are removable for cleaning access. Trivets, burner assemblies and wok stand can be washed in warm soapy water.

INSTALLATION

With a benchtop displacement of 75mm, the installation underbench is possible of oven, cupboards or drawers.

LINEAR DESIGN

The PGA64 is supplied fitted with Linear design control knobs and fits within a comprehensive portfolio of Smeg appliances with complementing aesthetics. Canali design control knobs are included in the packaging box.
