

# INSTALLATION WARNING SHEET FOR STACKING KIT WITH BELT

- \* This product is designed for the installation of the Dryer on the Washing Machine only. Using it on other items shall render your product out of warranty cover.
- \* Before installation, check if there are any sharp edges in the areas where the belt passes through. During the initial installation and in case of re-installation, check for any damage on the belt and do not use damaged belts. A clearance of 1cm at least shall be allowed on the left and right of the machines after the installation with the belt; and no surface shall contact with the belt.
- \* Tightening reference line (!) on the belt has been adjusted for machines with dimensions of 60cm x 84cm. If the dimensions of your machine are different, ignore the reference line, tighten the belt so that the belt shall be tight and the kit shall not move. After tightening the belt tightly, check that the belt buckle is locked by pulling on the belt.

- \* If your washing machine or dryer shall be serviced, they shall not be serviced without disassembling the kit. If the kit is installed by the service, re-installation after service shall also be performed by the Authorized Service. If the taped parts of the kit have been removed, new tape shall be used during re-installation.
