<b>Easy cleaning</b>	<b>Perfect heat control</b>		

---

### BENEFITS

---

<b>Pause when you need to</b> When you're cooking, those pesky interruptions won't be a bother anymore. That's because you can simply pause what you're doing. Just press the Pause icon on your induction cooktop and all operating zones will drop to a Keep Warm mode. And when you're ready to resume, touch the Pause icon again and all zones will return to their previous setting.	<b>QuickCook Timer</b> Now even when things get busy in the kitchen, you'll never lose track when you're cooking. This nifty timer counts down and even turns the zone off. Now you can cook the perfect steak or boiled eggs or any other meal exactly to your liking. You'll never ruin a quick family meal again!
<b>Induction cooking</b> Enjoy the safety and efficiency of induction cooking. Almost twice as fast as gas or electric in transforming energy into heat, you'll save not only time but money too. What's more, induction cooking only generates heat in the cookware, so surfaces around the pot are cool to touch. Therefore the cooking environment remains cooler and safer. The surface is also easy to clean, as any spills are simply wiped away.	<b>Touch on glass controls</b> With flat easy-clean touch on glass controls at your fingertips, you can easily control the heat. So all you need to do is concentrate on preparing the perfect meal.

---

You can be energy wise

Induction cooking is almost twice as efficient as gas or electric in transforming energy into heat, saving you time and money.

Cooking can be a family experience

With no naked flames or elements the whole family can join in the fun of cooking.
