Catalytic Liners

Catalytic Liners are designed to assist in oven cleaning by absorbing grease residue. At high temperatures, the grease is converted into ash and can be wiped away once the oven has cooled.

Telescopic Sliding Shelves

A telescopic shelf is a smooth sliding shelf that allows you to easily and safely check and remove dishes from the oven. They are strong enough to hold heavy items even when fully extended.

Removable Cool Glass Door

Our oven doors feature multiple layers of glass that keep heat locked inside, providing more efficient cooking and keeping the outside of the oven cool and safe to touch. Each layer can be easily removed when cleaning is needed.
