BKE590

CONGRATULATIONS

on the purchase of your new
Breville Comfort Kettle™

CONTENTS

- 4** Breville recommends safety first
- 6** Know your Breville Comfort Kettle™
- 8** Breville Quiet Boil Technology
- 10** Operating your Breville Comfort Kettle™
- 12** Care & Cleaning

At Breville we are very safety conscious. We design and manufacture consumer products with the safety of you, our valued customer, foremost in mind. In addition we ask that you exercise a degree of care when using any electrical appliance and adhere to the following precautions.

IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS BEFORE USE AND SAVE FOR FUTURE REFERENCE

- Carefully read all instructions before operating the Breville Comfort Kettle™ for the first time and save for future reference.
- Remove and safely discard any packaging material and promotional labels before using the kettle for the first time.
- To eliminate a choking hazard for young children, remove and safely discard the protective cover fitted to the power plug of this appliance.
- This kettle has been designed specifically for the purpose of boiling drinking quality water only. Under no circumstances should this product be used to boil any other liquids or foodstuffs.
- Do not place the kettle near the edge of a bench or table during operation. Ensure that the surface is level, clean and free of water and other substances.
- Do not operate the kettle on a sink drain board.
- Do not place the kettle on or near a hot gas burner, electric element or where it could touch a heated oven.
- Keep the kettle clear of walls, curtains and other heat or steam sensitive materials. Minimum 20cm distance.
- Always ensure the kettle is properly assembled before use. Follow the instructions provided in this book.
- The kettle must be used only with the power base supplied.
- The kettle is not intended to be operated by means of an external timer or separate remote control system.
- Do not touch hot surfaces. Use the handle for lifting and carrying the kettle.
- Do not place anything on top of the lid.
- Always ensure the kettle switch is in the 'off' position, then turn the power off at the power outlet and remove the plug from the power outlet before attempting to move the appliance, when the appliance is not in use and before cleaning and storing.
- Use caution when pouring water from the kettle, as boiling water and steam will scald. Do not pour water too quickly.
- To protect against electric shock, do not immerse the kettle base, power base, power cord or power plug in water or allow moisture to come in contact with these parts.
- Do not remove the kettle from the power base during operation. Ensure the kettle has switched to 'off' position after the water has boiled before removing the kettle from the power base.
- Do not move the kettle while it is switched on.
- Do not open the lid during operation.
- Do not overfill the kettle past the maximum water level mark. If the kettle is overfilled, boiling water may be ejected.
- Keep the kettle clean. Follow the cleaning instructions provided in this book.

IMPORTANT SAFEGUARDS FOR ALL ELECTRICAL APPLIANCES

- Fully unwind power cord before use.
- Do not let power cord hang over the edge of a bench or table, touch hot surfaces or become knotted.
- To protect against electric shock do not immerse the power cord, power plug or appliance in water or any other liquid.
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- It is recommended to regularly inspect the appliance. To avoid a hazard, do not use the appliance if the power cord, power plug or appliance becomes damaged in any way. Return the entire appliance to the nearest authorized Breville Service Centre for examination and/or repair.
- Any maintenance other than cleaning should be performed at an authorized Breville Service Centre.
- This appliance is for household use only. Do not use this appliance for anything other than its intended use. Do not use in moving vehicles or boats. Do not use outdoors. Misuse may cause injury.
- The installation of a residual current device (safety switch is recommended to provide additional safety protection when using electrical appliances. It is advisable that a safety switch with a rated residual operating current not exceeding 30mA be installed in the electrical circuit supplying the appliance. See your electrician for professional advice.

BREVILLE ASSIST™ PLUG

- Your Breville appliance comes with a unique Assist™ Plug, conveniently designed with a finger hole in the power plug for easy and safe removal from the wall outlet. For safety reasons it is recommended you plug your Breville appliance directly into its own electrical outlet on a dedicated circuit separate from other appliances. If the electrical circuit is overloaded with other appliances, your appliance may not function properly. Using in conjunction with a power strip or extension cord is not recommended.

WARNING

Do not operate the kettle on an inclined surface. Do not move the kettle while it is switched on.

BREVILLE QUIET BOIL TECHNOLOGY

BREVILLE QUIET BOIL TECHNOLOGY

HOW IT WORKS

The innovative Quiet Boil Technology reduces the size of the water bubbles, minimizing the noise level during heating. It is only at the point of boil that a light bubbling noise can be heard which will indicate that the water has boiled.

MAINTAINING QUIET BOIL TECHNOLOGY

Through regular use over time, scale can build up in the kettle that can affect the performance of the Quiet Boil Technology as well as the life of the kettle.

Lime and phosphate are common forms of scale that can damage your kettle. Lime scale, a harmless mineral, comes in the appearance of white, coloured or rusty-looking build up on the inner walls of the kettle. Phosphate scale cannot be seen, however, it can cause the water to appear cloudy when heated.

To prevent scale from damaging your kettle, ensure that the kettle is de-scaled regularly. This is done by emptying the kettle after use and not allowing water to stand in the kettle overnight.

Please read Page 13 for information on de-scaling your Breville Comfort Kettle™.

NOTE

De-scale your kettle when required to ensure maximum performance. Quiet Boil Technology will not be as effective if scale builds up inside the kettle.

WARNING

Do not remove the diffuser ring located inside the kettle.

OPERATING

your Breville Comfort Kettle™

OPERATING YOUR BREVILLE COMFORT KETTLE™

BEFORE FIRST USE

Remove any promotional material attached to your kettle. It is recommended that before first use, the kettle is filled to the maximum level with cold tap water, boiled and water discarded. Your kettle will only operate when positioned on the power base with the 'On/Off' switch in the 'On' position. The kettle will automatically switch off once the water has boiled.

OPERATION OF YOUR KETTLE

To fill the kettle, remove it from the power base and open lid by pressing the lid release button. Fill with the desired amount of water.

NOTE

Always fill the kettle between the minimum (500ml) and maximum (1700ml) marks on the water window. Too little water will result in the kettle switching 'Off' before the water has boiled or reached the selected temperature. Filling above the maximum mark (MAX) may result in boiling water splashing from the kettle.

Ensure the lid is locked firmly into place. Position the kettle securely onto the power base. Insert the power plug into a 230/240V power outlet and switch on.

Press the 'On/Off' switch to the 'On' position for water to boil.

NOTE

This kettle must only be used with the power base supplied. Use caution when pouring water from your kettle, as boiling water will scald. Do not pour the water too quickly.

The kettle will automatically switch 'off' once the water has boiled. Lift the kettle from the power base and pour the water. Take care to hold the kettle level, especially when filled to the maximum level. To re-boil it may be necessary to wait for a few seconds to allow the control to reset.

If further heating of the kettle is not required, switch 'Off' at the power outlet, unplug the power cord and empty the water from the kettle. Replace the kettle onto the power base and close the lid.

SAFETY BOIL DRY PROTECTION

The kettle is fitted with a safety device, which protects against overheating should the appliance be operated with insufficient water. If this occurs, the kettle will stop heating. Switch 'Off' at the power outlet and allow kettle to cool before refilling. Remove the kettle from the power base and add water. Return the kettle to the power base. The safety device will then automatically reset.

For additional safety, your kettle is fitted with an additional thermal cut out. In the event of overheating, the kettle will automatically shut down to prevent further damage. Should this occur, take your kettle to an authorized Breville Service Centre.

WARNING

This appliance is designed for boiling of drinking quality water only. Never use to heat or boil any other liquids or foodstuffs. The lid should always be firmly in place and locked into the closed position before use.

WARNING

Do not press the lid release button on the handle to open the lid during and after operation. This may result in boiling water splashing from the kettle. Pour out all the hot water from the kettle before opening the lid to refill.

CARE & CLEANING

your Breville Comfort Kettle™

CARE & CLEANING FOR YOUR BREVILLE COMFORT KETTLE™

Always switch 'off' at the power outlet and unplug the appliance from the power outlet before cleaning.

REMOVABLE FILTER

The Breville Comfort Kettle™ features a removable mesh filter to remove scale deposits for cleaner water. To remove the scale deposits from the filter, open the lid and slide the filter up and out of the kettle.

The filter can be cleaned by running under hot water and rubbing with a cleaning cloth or brush. To replace filter, simply slide the filter down into the slot behind the spout of the kettle and push back into position.

NOTE

The filter could become damaged with time. Please check regularly and replace if found damaged.

NOTE

The concealed element in the base of the kettle is made from high quality stainless steel. Any brown stains appearing are the result of mineral deposits and are not rust.

REMOVAL OF MINERAL DEPOSITS

Mineral deposits in tap water may cause the kettle interior and water gauge to discolour over time. This may be removed by using Breville Kettle Cleaner (BKC250) or a proprietary kettle descaler which is available from most leading supermarkets, department and hardware stores.

BREVILLE KETTLE CLEANER

Directions for use:

1. Add 125ml of Breville Kettle Cleaner to 2 litres of water.
2. Fill kettle with mixture on a protected surface.
3. Bring kettle to boil and let stand for 30 minutes.
4. Clean spout by using a cloth dampened with Breville Kettle Cleaner, rub well. Then wipe off.
5. Bring the kettle to boil for a second time, then empty solution.
6. Fill kettle with fresh water and bring to the boil, discard boiled water.

Your kettle is now ready to make your next cup of tea/coffee.

WARNING

Never immerse the kettle base, switch area, power base, power cord or power plug in water, or allow moisture to come into contact with these parts.

TO CLEAN THE EXTERIOR

The outside of the kettle may be wiped over with a damp cloth and polished with a soft dry cloth.

NOTE

Do not use chemicals, alkaline cleaning agents, steel wool or abrasive cleaners to clean the inside or outside of the kettle. Use a mild cleaning agent with a soft damp cloth.

STORAGE

Ensure the kettle is switched off, clean and dry before storing. Ensure the lid is closed and locked securely into place. Wrap the power cord around the cord storage under the power base. Stand the kettle upright on the power base. Do not store anything on top.
