PRODUCT DESCRIPTION – THE STORY

One might think, using an electric water kettle when being “unplugged” is all the rage, is sort of counter-intuitive. Well, not really. Even the French press – one of the greenest way to brew quality coffee - needs boiling water. The BISTRO electric water kettles are as small as possible, and they deliver that boiling water with the lowest energy consumption possible. Next to the 1.0l kettle there is even a 0.5l version of the kettle available – less is more. The most environmentally friendly thing you can do boiling water is to never boil more than you actually need. Whether you're a tea lover or a coffee aficionado – the BISTRO electric water kettles are the kitchen staple you can't do without. They're made from plastic, silicone and stainless steel and come in a variety of gorgeous colors that make a statement on any kitchen counter. Simple to use, an on/off button is built into the handle for a perfect grip.

KEY FEATURES & BENEFITS – AN OVERVIEW

Capacity 0.5l

Measurements 100x172x195mm / 3.9 x 6.7 x 7.6 inch

Packaging type Giftbox

Pieces per sales unit 1

Unit per master carton 2

Material Plastic, silicone, Stainless steel

Dishwasher safe No

Microwave safe No

Induction No

Ovenware No

Freezer No
