EGO! SMART PLUG & APP

efergy®

ENERGY SAVING ADAPTOR

INTRODUCTION

The Appliance SmartPlug from efergy uses the latest in WiFi communication technology to allow users to control the power to a network of appliances within their property and monitor their energy usage.

Simply download our app, plug your appliance into a SmartPlug and connect to your local WiFi router. It will then search for any installed smart plugs and tell you whether they are on or off. After the sockets have been installed and start communcating with your router, you can take control further. By connecting to the internet anywhere in the world, whether by WiFi or 3/4G, you can open the app and check whether or not you left your power hungry appliances on and then turn them off with the touch of a button.

PRODUCT FEATURES

Turn appliances on/ off from the touch a button and see how much energy powered applainces are using.

Monitor how much energy & money and your appliances have consumed as well as their relative carbon emissions

Check if appliances have been left on standby and switch them off or set auto-save to save energy.

Set a range of timers to control when appliances should turn on/off. Group appliances to control more than one at a time.

Enable the Auto-Home/ Auto-Away feature to allow the app to track your location via GPS. Set appliances to turn on or off when within 500m of your home. Great for setting a space heater to turn on just before you arrive for a cosy welcome.

EASY TO INSTALL

• Download and install the iPhone/ Android app
