

INSTALLATION INFORMATION FOR TITAN (CE901 SERIES) CERAMIC COOKTOPS/HOBS

IMPORTANT INFORMATION

Please make this information available to the person responsible for installing this cooktop as it could reduce your installation costs.

CAUTION: In order to avoid a hazard, these appliances must be installed according to these instructions. The appliance is to be only installed by an authorized person.

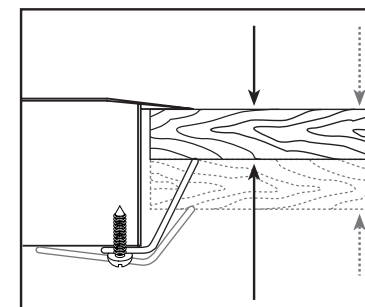

Read these instructions completely before installing or using this product.

BEFORE YOU START

- Do** Ensure the countertop is square and level and ensure no structural members interfere with space requirements.
- Do** Ensure a suitable disconnection switch is incorporated in the permanent wiring, mounted and positioned to comply with the Local Wiring Rules and Regulations.
- Do** Use easy to clean finishes for the wall surfaces surrounding the cooktop/hob to aid removal of any cooking fume staining resulting from the use of the cooktop/hob.
- Do** Consult local building authorities and by-laws if in doubt regarding installation.
- Do** Ensure that the power cable is not accessible via cupboard doors after installation.
- Do** Ensure that there is adequate clearance between the cutout and the rear and/or side walls.

CLAMPING DOWN COOKTOP/HOB

Place the cooktop/hob into the cutout and tighten with the supplied clamps. These will cope with bench thickness 20-50mm.

INFORMATION

Current Installation Instructions, Product dimensions and specifications are available on the *Fisher & Paykel* web site.

www.fisherpaykel.com

DIMENSIONS

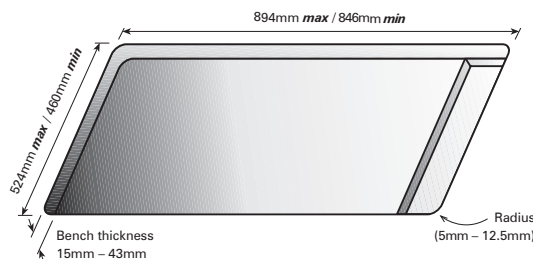

COOKTOP/HOB CUTOUT DIMENSIONS

Minimum Depths (below countertop/mounting surface)

- CE901 75mm (body of product)
85mm (mains cable - right-hand underside, see below)

A 10mm gap is needed below the product in cases where there is a combustible shelf.

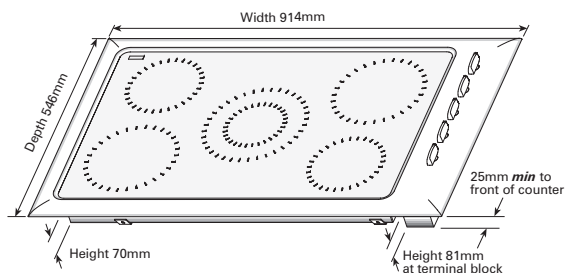

The cooktop can be installed above a *Fisher & Paykel* DishDrawer® or *Fisher & Paykel* single wall oven if a 10mm ($\frac{3}{8}$ ") gap is provided between the bottom of the cooktop and the top of the DishDrawer® or oven.

COOKTOP/HOB DIMENSIONS

Model	Width	Depth	Height
CE901/M	914mm	546mm	70mm
			81mm (terminal block)

Power supply 8.3kW @ 235V (35.4A)

INSTALLATION CHECKLIST

Please check through the list provided to ensure correct installation.

- ☐ Is the product earthed?
- ☐ Check that the power cable is NOT touching the product. This will ensure that the cable is not damaged by heat from the product.
- ☐ Is the product clamped down securely?

TEST THE COOKTOP OPERATES CORRECTLY

Make sure the top surface of the cooktop/hob is clear of any debris. Wipe the glass surface clean.

Turn each knob and verify that the correct element glows, and that the indicators glow white (CE901 - red). Leave controls for one minute before turning off. Check that the indicators change colour when you turn the elements off. This warns that the glass surface is still hot. These lights should turn off completely when the elements cool down.

Encourage the user to read the User Guide - it contains important safety information as well as tips to make the most of the new cooktop/hob.

CUSTOMER SUPPORT

BEFORE YOU CALL FOR SERVICE OR ASSISTANCE...

Check the things you can do yourself.

Refer to your User Guide and check...

1. Your product is correctly installed.
2. You are familiar with its normal operation.

If after checking these points you still need assistance, please call your Fisher & Paykel retailer who is trained to provide information on your product, or if we can be of any further help, please contact our Customer Care Centre.
