

Microdermabrasion (Exfoliator and Cooling) Device

The Homedics® Radiance Microdermabrasion Exfoliation and Cooling Device Bringing professional spa skincare to your own home.

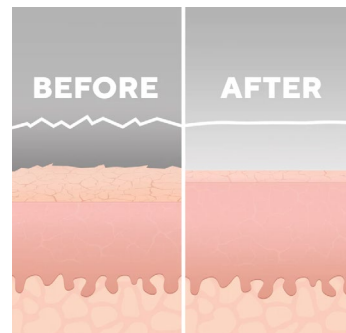

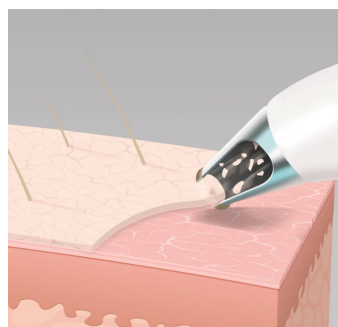

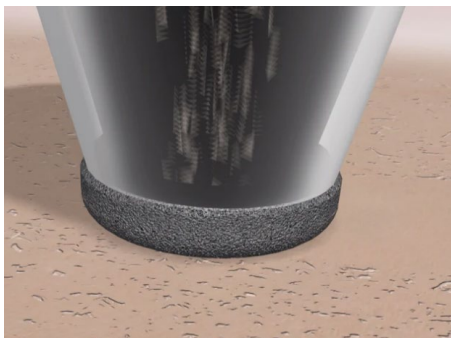

Microdermabrasion helps to restore youthful radiance to the skin, assists in improving skin tone and texture, aids in smoothing the appearance of fine lines and wrinkles and helps to reduce the appearance of age spots and sun damage.

Use regularly to maintain youthful-looking skin.

By clearing away the dead skin, you can make way for fresh cells to grow, helping to leave you with a smooth and radiant complexion. Like any deep exfoliation, a good moisturiser after every treatment is a must to help firm and hydrate skin.

FEATURES:

- 4 Intensity Levels - Adjust for maximum comfort & effectiveness.
- 2 Diamond Tips - Normal & Sensitive Tips
- Cooling Surface - Helps to soothe skin post-treatment
- Black Wool Filters - 100 black wool filters included
