

Simply perfect. Perfectly simple.

Introducing i-DOS: the automatic, intelligent dosing system, and the range of Bosch laundry appliances.

3rd Edition 2014

www.bosch-home.com.au

BOSCH
Invented for life

Technologies that not only improve our life today, but tomorrow as well.

Even if it does sound old-fashioned, at Bosch we are still building our appliances the way we did 125 years ago. Our standards have always remained the same: nothing leaves our factory until it is 100% perfect in terms of quality, performance and sustainability. That is why we sometimes take more time to research, develop and test our appliances. We have remained true to the principle of Robert Bosch all those years ago; we would rather lose money than the trust of our customers. And we think that this is actually quite modern.

Green Technology inside

This signet denotes products that focus on energy and water efficiency while achieving top performance based on Bosch technologies – and, like all Bosch products, have been manufactured with the aim of minimizing their impact on the environment. The signet stands for the resource-efficiency of our products – quite simply, for their 'Green Technology'.

- EcoSilence Drive™ motor with 5 Star water rating and 4 Star energy rating
- VarioPerfect™ washing logic for optimum water and energy consumption
- ActiveAir Heat pump dryer with 6 Star energy rating
- Avantixx first washer/dryer in the world that dries without water
- New premium class washing machine and dryer: HomeProfessional

Bosch quality

Over the years, Bosch has been surveyed to be one of the most reliable brands of washing machines by a leading independent consumer organisation in Australia.

Every Bosch washer to leave our factory complies with stringent standards. All sub-assemblies and components undergo thorough inspection before they are included in the production of your new Bosch washing machine. To demonstrate our commitment to quality, a further 2-3% of all production is resubmitted for quality audits. We stand proud by all our products when they leave the factory so you have the confidence you have come to rely on when your appliance arrives. We back this up with a 2-year national warranty and an extensive after-sales service network throughout Australia.

What is ECARF?

ECARF promotes 'For a better life with allergies'. It is the European Centre for Allergy Research, founded in Berlin in 2003. The ECARF quality seal stands for certified quality standards and is designed to help allergic patients select appropriate goods and services.

A number of Bosch models have received the ECARF quality tested seal: WAE24463AU, WAE22464AU, WAS28461AU, WAS28464AU, WAS28440AU, WAY32540AU, WAY32840AU, WAP24160AU, and WWH28441AU.

Scan QR code for more information

You can overdose or underdose. Or you can get the dosing just right.

New!

Correct dosing depends on several factors. Simply guessing usually leads to incorrect dosing. Using too much detergent automatically results in increased water and energy consumption – that's not just bad for your laundry, it's also harmful to the environment. i-DOS, the integrated automatic dosing system from Bosch, dispenses the correct amount of liquid detergent to the very millilitre. Just fill the chamber once and i-DOS gets the dosing right for up to 26 washes[#].

Overdosing

Too much detergent is not only harmful to your laundry and your skin; it also means increased consumption of water and energy.

Underdosing

Too little detergent is false economy since you'll have to wash clothes repeatedly in order to get them really clean.

i-DOS

Correct Dosing

i-DOS, the integrated automatic dosing system, dispenses the correct amount of liquid detergent to the very millilitre. That means a reduction of up to 30% in detergent requirements and a saving of up to 7.062* litres of water a year.

* Source: wfk, Institute for Applied Research, Survey Report WL5132/10 (Germany).

[#] Based on OMO standard liquid detergent (non-concentrate) – average 50ml dose for a normal load.

At last, a washing machine that does everything right. Automatically.

The Bosch i-DOS HomeProfessional always knows what it's doing, that's because a large number of intelligent sensors located inside the washing machine monitor the entire wash process.

How much water is necessary?

The second sensor featured in the ActiveWater™ technology, the flow rate sensor, knows at any given time how much water has been supplied to the drum. Taking the results of the water level sensor into account, it determines exactly how many rinse cycles are still required.

How much laundry is in the washing machine?

The load sensor detects how much laundry is in the drum. This information is important later on when exactly dosing the required quantity of detergent.

How soiled is the laundry?

AquaSensor continuously scans the water in the washing machine and knows exactly when the laundry is clean. Using this information, it controls the number of rinse cycles without using too much water.

Is the drum rotating smoothly?

The 3D sensor makes sure that the laundry is always washed evenly. It detects where the wash load is and returns it to the centre of the drum if the latter is out-of-balance. Regular drum action is not only kind to your laundry, but also to your washing machine.

How much detergent is necessary?

How much detergent is necessary?

The i-DOS dosage sensor* monitors the dosing pump. Along with the information from the other sensor, it directly adjusts dosing of the liquid detergent down to the last millilitre via the precision dosing pump. Exactly one millilitre of liquid detergent is dispensed per 18 gear revolutions. This allows for exceptionally precise dosing.

How much water is necessary?

What kind of fabrics are being washed?

What kind of fabrics are being washed?

The intelligent ActiveWater™ technology uses two sensors to ensure that not a single drop of water is wasted. The water level sensor measures how long it takes the laundry to soak up the water and also how much is soaked up. This allows it to determine what type of fabrics are to be washed in the automatic programs*. Cotton, for instance, soaks up more water than light synthetic textiles.

Is the drum rotating smoothly?

*Only available on the WAY32840AU.

Manual dosing
If you prefer, you can of course continue to dose manually for all programs except the automatic ones. This is ideal, for instance, when you wish to use a special detergent, powder or stain remover salt.

i-DOS drawer 1
Add up to 1.3 litres of liquid detergent (eg. universal or colour) to this drawer.

i-DOS drawer 2
Add 0.5 litres of liquid detergent or fabric conditioner to this drawer.

Automatic programs
All you have to do to obtain perfect washing results is press the start button: with the two automatic programs for normal or sensitive wash loads, the necessary amount of detergent is dosed automatically and the wash process optimally adjusted to the demands of the particular wash load.

The **Automatic program** (35-40°C) is suitable for all hard wearing textiles made of cotton and linen. For example, T-shirts, sweaters, trousers, bed linen, hand towels and table linen.

The **Automatic Soft program** (25-30°C) is ideal for more delicate clothes made of cotton, linen, synthetics or mixed blends, like shirts, blouses or T-shirts.

What could be more simple? Fill up once and wash 26 times.*

You can rely on this convenience: fill up once and save every time you wash. Thanks to intelligent automatic dosing and automatic programs, the i-DOS HomeProfessional always does everything exactly right.

This is how i-DOS works:

Special sensors determine the laundry's weight and type of textile and in the automatic programs, hardness of water, even the degree of soiling.

Based on these factors, the optimum amount of detergent is dispensed.

Weight of laundry

Type of fabric

Level of soiling

Hardness of water

* Based on OMO standard liquid detergent (non-concentrate) – average 50ml dose for a normal load.

EcoSilence Drive™. Built to last.

EcoSilence Drive™

Strong

The EcoSilence Drive™ is Bosch's most powerful motor to date. Instead of supplying electricity to the rotating armature via carbon brushes, we equipped the armature itself with extremely strong permanent magnets.

Long-lasting

Friction generates heat, by dispensing with carbon brushes, the EcoSilence Drive™ won't heat up and won't wear.

Economical

The EcoSilence Drive™ sets a new benchmark in energy efficiency. It is more economical than conventional motors as there are no copper or aluminium windings in the rotor.

Quiet

As there is no friction from carbon brushes, there is also no excessive motor noise. That makes the EcoSilence Drive™ one of the quietest motors in its class and the best example that 'less can indeed be more'.

The best way to get rid of stains? Automatically.

Forget long soaking times, marks left by stain-remover soap, bleached edges, risky treatment with alcohol and diluted ammonia. Simply press a button instead and watch stains disappear.

Automatic stain removal*

The automatic stain removing option reliably removes the 16 most stubborn stains. The washing machine automatically adjusts the temperature, drum action and soaking time before the program starts.

The 16 most common stains:

- | | |
|----------------|----------------|
| • Baby food | • Blood |
| • Butter / oil | • Egg |
| • Soil / sand | • Grass |
| • Coffee | • Cosmetics |
| • Red wine | • Chocolate |
| • Dirty socks | • Perspiration |
| • Tea | • Tomatoes |
| • Oranges | • Strawberries |

Wash programs and options.

Wash programs

In addition to the standard wash programs, the following special programs are available on certain models.

Allergy Plus

A higher water level, extra rinse cycles and a higher water temperature (eg. 60°C) wash away detergent residues left in the laundry for exceptional hygienic cleaning. Good news for those with sensitive skin.

Reload Function

Reload Function allows you to add additional items of laundry after the program has started if it is within safe water and temperature levels.

SpeedPerfect

Reduces program times for the fastest wash possible - perfect for when speed is of the essence.

EcoPerfect

Allows most programs to be more efficient and is the ultimate program for saving energy.

SuperQuick 15 / SuperQuick 30

A short wash program of approximately 15 minutes for up to 2kg of lightly soiled washing or a 30 minute wash program for up to 3.5kg. A wash, with extra rinse cycles and improved rinse spinning, this is one of the shortest complete wash programs.

PowerWash 60

The PowerWash 60 program for medium soiled loads for up to 5kg, provides excellent wash results in just 60 minutes.

Down Wear

Down feathers are optimally moistened and washed gently. Down quilts also have ample room in the large VarioSoft™ drum.

Shirts / Blouses

This program is ideal for 2kg of shirts and blouses. The gentle spin cycle makes ironing effortless and for greater convenience, no-iron shirts can simply be hung to dry.

Dark Wash

Dark clothes, particularly jeans, often need special treatment. The Dark Wash program suitable for cotton and synthetic textiles, features low water temperatures, which provide better wash results for darker garments. The gentle washing action helps protect fibres against bleeding and keeps dark clothes looking new. During the spin intervals, a small amount of residual moisture in the fabric prevents the laundry from creasing, which helps reduce ironing time.

Delicates / Silk Program

A wash program suitable for silks, delicate viscose and synthetic items. The standard wash temperature is preselected at 30°C, and depending on the fabric wash instructions, may be increased to 40°C or even reduced to a cold wash to provide a temperature-controlled wash.

Wool Program

The wool program is tailored to give the optimum treatment for wool garments. It offers a gentle wash action at an optimum temperature of 30°C. The gentle spin at the end of the cycle extracts water gently, which helps garments retain their shape.

Pre-wash

For stubborn stains or heavily soiled garments, a pre-wash will loosen dirt and remove it prior to the main wash.

Mixed Load

A program designed to wash mixed fabrics of up to 3.5kg in up to 60 minutes. Ideal for garments that need to be washed urgently, without the need to wait for a full load.

Sportswear

The Sportswear wash program is designed specifically for functional and sports fabrics with micro-fibre technology, like those used for gym, cycling or jogging. The program offers two rinse cycles with a gentle washing action for greater fabric protection.

Cottons Eco

For even greater efficiency, Bosch has developed a program for the resource-savvy. On selected models, the Cottons Eco wash program offers an initial 60 minute wash cycle before the first rinse. Ideal for light-to-medium soiled garments, the longer wash reduces resource consumption, while still providing impressive wash results.

Easy Iron / Less Ironing

Clothes are tumbled gently during the normal program spin cycle and then at the end of the spin phase. This keeps laundry fluffy and tangle-free for reduced creasing and easy ironing.

The Bosch i-DOS HomeProfessional also offers the additional 'Silent Wash' option and a 'Memory' option which saves your wash preferences.

*Only available on the WAY32840AU.

Features vary depending on model. Please check individual product specifications.

The Anatomy of Bosch Washing.

User-friendly interface

Stylish, straightforward control panel with JogDial and TFT display for easy selection of wash programs, spin speeds, temperature and other functions.

VarioPerfect™

VarioPerfect™ ensures top wash results for all types of fabrics and every load. With EcoPerfect, most programs can be set to be more efficient, saving up to 40% in energy consumption, while SpeedPerfect can cut your wash time by up to 50%#.

i-DOS intelligent automatic dosing system

The intelligent automatic dosing system automatically dispenses liquid detergent with millilitre precision – for perfect washing and rinsing results.

Sensor technology

A network of intelligent sensors automatically control the wash process that not only ensures perfect wash results, but minimises water and energy consumption.

AquaStop™ anti-flood protection

The AquaStop™ system provides 100% anti-flood protection* and is guaranteed for the entire service life of the appliance.

ActiveWater™ technology

All Bosch washing machines feature an automatic load sensing function that adapts the water consumption to the relevant load size. On selected models, ActiveWater™ Plus Technology takes this to the next level of intelligence boasting up to 256 load levels, which can detect the precise amount of water flowing into the machine. This means that 1kg of laundry can be washed just as efficiently as a full 8kg load.

Asymmetrical porthole

The glass of the special asymmetrically curved porthole softly projects into the VarioSoft™ drum. It gently returns washing back into the centre of drum on each rotation, ensuring even circulation.

EcoSilence Drive™

Powerful, durable, quiet and efficient. The EcoSilence Drive™ motor works without brushes, eliminating mechanical stress, friction and wear, to provide better washing performance.

VarioSoft™ drum system

With its special drum design, drum rotations and asymmetrical porthole, the VarioSoft™ drum provides top washing results and helps textiles look their best.

AntiVibration™ side walls

The AntiVibration™ design of the side walls provides stability and reduces vibrations. It also helps regulate noise levels, making it extremely quiet during the spin cycle.

Features vary depending on model. Please check individual product specifications. * Must be connected and switched on at the mains.
Based on an average across Bosch washing machines. Program setting for testing according to valid European standard EN60456. Tested on overseas model.

AntiVibration™ design.

Psst! The special AntiVibration™ design of the side walls makes Bosch washing machines and dryers extremely quiet. It helps reduce vibrations and ensures greater stability. Just in case you want to do the washing at night.

Spa treatment for your laundry.

Softly curved paddles, a gently sloped raindrop design and special programs that are particularly kind to your clothes add up to perfect laundry care.

VarioSoft™ drum system

Depending on the drum action, the special raindrop design of the wash drum ensures gentle or more intensive washing. While the steep side ensures a more intensive wash action, the flatter side is particularly gentle.

In addition, the 8kg drum on selected washing machines and tumble dryers provides ample space for your laundry to spread out loosely. There is even plenty of room for larger items like down jackets and pillows.

Sensitive Drying System

With the textile-friendly drum design and ultra smooth interior, the Sensitive Drying System helps to give your laundry the best possible care. Softly curved paddles gently agitate the laundry with every drum rotation. Items are not flattened against the sides of the drum but are fluffed up with air at just the right temperature. All this amounts to soft fluffy laundry – even after the 100th drying cycle.

flat side for gentle wash action

steep side for intensive wash action

VarioSoft™ drum design

Features vary depending on model. Please check individual product specifications.

The Anatomy of Bosch Drying.

AutoDry

Intelligent sensors monitor the temperature and residual moisture content throughout the drying process to ensure your garments are dried precisely as to the desired setting without over or under heating. This ensures garments are treated with maximum care whether you select iron, cupboard or extra dry programs.

AntiVibration™ side walls

The AntiVibration™ design of the side walls in Bosch dryers is a focus of attention. Its construction ensures greater stability and less vibration during operation. It also helps regulate noise levels, making it extremely quiet during operation.

Features vary depending on model. Please check individual product specifications.
* Tested in accordance with Australian Standard AU/NZ 2442. Information correct as of April 2013.

SelfCleaning Condenser™

The patented self-cleaning condenser not only saves you the chore of manual cleaning, it also ensures the dryer performs economically with optimal energy efficiency. It also outperforms the qualifying limit for a 6 Star energy rating dryer by 33%*.

Sensitive Drying System

A textile-friendly drum design and SoftFlow® paddles ensure soft, fluffy laundry. The large capacity drum (depending on model) additionally protects laundry and reduces creasing.

Features vary depending on model. Please check individual product specifications.
* Only applies to heat pump dryers WTW84360AU and WTY88700AU.

User-friendly interface

All functions are now easier and faster to access thanks to the new user logics and light guidance system.

VarioPerfect™*

Use the optional add-on SpeedPerfect and EcoPerfect options allow you to choose between saving time or conserving energy during drying.

EcoSilence Compressor*

Thanks to the latest technology, the EcoSilence Compressor switches off automatically when it is not required. This means that the motor not only lasts longer, but at the same time, saves a lot of electricity.

Dry smarter with maximum efficiency.

100%

drying efficiency with the EcoSilence Compressor

The centrepiece of the HomeProfessional dryer is the EcoSilence Compressor. Thanks to advanced technology, it compresses the refrigerant at high speed, which produces superior drying results no matter whether you wish to dry items extra fast or more economically.

The SpeedPerfect option can be added to several drying programs for perfect, gently dried laundry in record time. Select SpeedPerfect, for instance, to dry a 3.5kg load of easy-care garments to 'iron dry' in just 32 minutes.[#]

33%

more economical than the qualifying limit for 6 star energy rated dyers

Save even more energy with the add-on EcoPerfect option, turning selected Bosch dryers into some of Australia's most economical dryers.

62[¢][^]

Per use: 109 kWh ÷ 52 x 0.30 (cents)
For the cost of approximately one cup of coffee* the HomeProfessional dryer can dry over 5 loads of washing.

[#] The time it takes to dry will vary on the program settings selected.
[^] Based on \$0.30/kWh Smarter Choice calculator © 2014 State of New South Wales and Office of Environment and Heritage as at 8 September 2014. The Smarter Choice calculator uses data collected from a number of sources and gives estimates of average power prices in each state. Only applies to Bosch HomeProfessional WTY88700AU based on 109 kWh per year Cottons, EcoPerfect, Cupboard dry extra, 1000rpm, used once per week. Tariff given is a general rate, for exact cost, adjust to your local electricity tariff detailed by your energy provider.
* An average coffee costs \$3.50.

Drying options for all your needs.

Drying features

In addition to the standard drying programs the following special programs are available on certain models.

Towels

Even heavy textiles are fully dried thanks to moisture-controlled programs in which the degree of moisture remaining in the garments is constantly measured. Terry towelling items like bath robes and hand towels come out soft and fluffy.

Down Wear

This special drying program is a moisture-controlled program with interval spinning. It dries up to 1.5kg of down clothing to soft and feather-light perfection without the addition of agitating aids (eg. tennis balls).

ActiveAir Technology

ActiveAir dryers are one of the most economical dryers on the market. The heat pump technology is designed to work without conventional heating. The air used for drying is heated by the heat pump and the existing heat is reused efficiently during the entire drying process.

Condenser

Condenser dryers collect the condensed water vapour that occurs during the drying process in an easy-to-access container. As a result they do not require an external wall vent.

Vented

Vented dryers exhaust the water vapour through a pipe at the back of the dryer, which must ventilate directly into the open air through an outside wall vent.

Glass Door

Selected Bosch dryers have a clear glass door, which offers maximum visibility during the drying program.

SelfCleaning Condenser™

For maximum convenience, the condenser is automatically cleaned up to four times during the drying cycle. This eliminates manual cleaning which is required by conventional condenser dryers.

Sensitive Drying System

The Sensitive Drying System from Bosch is designed to pamper your clothes. With a large interior and an innovative sculptured drum surface, your washing is penetrated by a constant flow of gentle air from all sides. The unique SoftFlow® paddles rotate individual garments to take the rough out of the tumble and provide even drying results.

Timer

The time remaining display shows you how long is left in the program, while the delay function allows you to delay the start of drying for 60 minutes or up to 24 hours.

Easy Iron

The reduced ironing feature with 2 setting options helps reduce creasing and extends the anti-creasing phase once the program has ended.

Low Heat Delicates

Bosch dryers have an innovative low heat feature that protects temperature sensitive textiles by automatically reducing the heat and extending the drying time.

SuperQuick 40

The SuperQuick 40 option is designed for washing to be dried quickly - maximum 2kg load. Specifically for synthetic fabrics, cotton and blended fabrics.

Sportswear

A gentle drying program developed to handle the functional and sports fabrics with micro-fibre technology that complements the Sportswear washing program in selected Bosch washers.

New!

100% Washer. 100% Dryer.

Not only have we rolled two appliances into one, we've also made sure the Avantixx Washer Dryer is a top performer. At the touch of a button, it can easily wash 7kg of laundry with 4.5 star water efficiency or effortlessly wash and dry 2kg of laundry in just 60 minutes.

AirCondensation Technology™

Did you know that some washer/dryers use water to dry clothes? At Bosch, we think that's wasteful so we developed AirCondensation Technology™. Thanks to this revolutionary technique, the Avantixx condensation system uses air to dry your clothes instead of water, making it one of Australia's most water-efficient dryers.*

This much is for sure: you can trust in our service.

Reliable, experienced, fast. The customer service of Bosch; before and after purchase.

Quality service straight from the manufacturer. Original Bosch.

We are committed to quality even when it comes to after-sales service because no one knows Bosch appliances better than our highly trained service engineers. Working with the latest equipment for measuring, diagnostics and repairs, Bosch service engineers only use original Bosch spare parts.

Original accessories. Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high-quality appliance for many years to come. To help you do so, we offer a wide range of Bosch certified cleaning and care products.

Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care with high-quality materials. We promise it in our 2-year manufacturer's warranty on all appliances.

Extensive customer service network. Just a call away.

Customer Care
Our friendly Bosch Customer Care team is on-hand to provide competent, reliable assistance. Before or after purchase, the Bosch team will be happy to advise you on products, their use and special functions.

Bosch Customer Care: 1300 368 339
Monday to Friday, 8:30am to 6:00pm.

Service & Repairs
Our team is there to provide the right advice on faults, arranging a visit of a service engineer and ordering the right accessories or spare parts.

Bosch Repairs & Service, Accessories and Spare Parts: 1300 360 447
Monday to Friday, 8:30am to 5:00pm.

Lifetime service. It goes without saying at Bosch.

Once your warranty period is over, we are still there to assist you. You can rely on expert care and first-rate service throughout the life cycle of your appliance. From missing instruction manuals to appliance repair – we take care of everything.

Bosch laundry appliances brochure is printed in an environmentally conscious way, using inks containing linseed oils and stock manufactured to high environmental standards.

This material is printed on Grange Offset, proudly manufactured by Australian Paper. Grange Offset is PEFC certified and manufactured in a facility with ISO 14001 EMS certification.

The print company has a strict environmental policy and they are an FSC®-certified print company. They use initiatives such as computer-to-plate technology, water/isopropyl alcohol reductions in printing presses and recycling throughout the organisation. This is in addition to the ink selection as discussed above and in their advice to all clients on the environmental implications of paper selection and usage.

Certain appliances shown in this catalogue are not available in your country. Model numbers and specifications are for reference only and subject to change without prior notice. Please contact your local Bosch retailer for the latest information.

Whilst every care has been taken in the preparation of this publication, BSH does not warrant the accuracy or completeness of the information in this publication and BSH reserves the right to alter specifications without notice.
