ignition	automatic electronic
features	removable cast-iron pot stands
warranty	two years parts and labour

SPACIOUS DESIGN

When space is not restrictive, this wide 72cm hob offers five burners ergonomically positioned for maximum benefit with the possibility of several styles of cooking at the one time. As well, cooked or yet-to-be-cooked foods in their utensils are neatly contained within one safe area instead of occupying otherwise precious bench preparation or dishing out areas.

ULTRA-RAPID BURNER

Centrally located, this large and versatile burner suits the larger stock pots, boilers, saucepans and griddles. A wok stand is supplied for easy fitment over the centre trivet for stir-fry cooking.

ELECTRONIC IGNITION

The cooktop is connected with a power cord of 1.3 metre length to be plugged into a GPO located according to installation needs below the benchline. This supplies a continuous stored charge to spark the gas supply to the individual burner of your choice.

FLAME FAILURE DEVICE

A flame failure device is fitted to all five burners. The FFD ensures that should a flame be extinguished prematurely (for instance, by smothering or a sudden air gust) the gas supply to the specific burner(s) is stopped within four seconds. For absolute safety, the burner(s) can only be reignited by physically resetting the control knob(s) to the OFF position and then following normal ignition procedure. Simply depress and turn the control of the desired cooking zone for almost instant flame ignition.

LOW MAINTENANCE

The seamless hob design allows for easy wipe-over cleaning and generous catchment of spills and accidental boilovers. The control knobs, also, are removable for cleaning access. Trivets, burner assemblies and wok stand can be washed in warm soapy water.

INSTALLATION

With a benchtop displacement of 75mm, the installation underbench is possible of oven or drawers.

LINEAR DESIGN

The PVS750A fits within the new Linear range of Smeg appliances with complementing aesthetics.
