

Instructions Manual

SHW610X2 - SHW910X2

EN 1. SAFETY INFORMATION

i For your safety and correct operation of the appliance, read this manual carefully before installation and use. Always keep these instructions with the appliance even if you move or sell it. Users must fully know the operation and safety features of the appliance.

⚠ The wire connection has to be done by specialized technician.

- The manufacturer will not be held liable for any damages resulting from incorrect or improper installation.
- The minimum safety distance between the cooker top and the extractor hood is 650 mm (some models can be installed at a lower height, please refer to the paragraphs on working dimensions and installation).
- If the instructions for installation for the gas hob specify a greater distance, this must be respected.
- Check that the mains voltage corresponds to that indicated on the rating plate fixed to the inside of the hood.
- Means for disconnection must be incorporated in the fixed wiring in accordance with the wiring rules.
- For Class I appliances, check that the domestic power supply guarantees adequate earthing.

- Connect the extractor to the exhaust flue through a pipe of minimum diameter 120 mm. The route of the flue must be as short as possible.
- Regulations concerning the discharge of air have to be fulfilled.
- Do not connect the extractor hood to exhaust ducts carrying combustion fumes (boilers, fireplaces, etc.).
- If the extractor is used in conjunction with non-electrical appliances (e.g. gas burning appliances), a sufficient degree of aeration must be guaranteed in the room in order to prevent the backflow of exhaust gas. When the cooker hood is used in conjunction with appliances supplied with energy other than electric, the negative pressure in the room must not exceed 0,04 mbar to prevent fumes being drawn back into the room by the cooker hood.
- The air must not be discharged into a flue that is used for exhausting fumes from appliances burning gas or other fuels.
- If the supply cord is damaged, it must be replaced from the manufacturer or its service agent.
- Connect the plug to a socket complying with current regulations, located in an accessible place.

- With regards to the technical and safety measures to be adopted for fume discharging it is important to closely follow the regulations provided by the local authorities.

 **WARNING:** Before installing the Hood, remove the protective films.

- Use only screws and small parts in support of the hood.

 **WARNING:** Failure to install the screws or fixing device in accordance with these instructions may result in electrical hazards.

- Do not look directly at the light through optical devices (binoculars, magnifying glasses...).
- Do not flambè under the range hood; risk of fire.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Children should be supervised to ensure that they do not play

with the appliance.

- The appliance is not to be used by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.

 Accessible parts may become hot when used with cooking appliances.

- Clean and/or replace the Filters after the specified time period (Fire hazard). See paragraph Care and Cleaning.
- There shall be adequate ventilation of the room when the range hood is used at the same time as appliances burning gas or other fuels (not applicable to appliances that only discharge the air back into the room).
- The symbol  on the product or on its packaging indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about

recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

- Range hoods and other cooking fume extractors may adversely affect the safe operation of appliances burning gas or other fuel (including those in other rooms) due to back flow of combustion gases. These gases can potentially result in carbon monoxide poisoning. After installation of a range hood or other cooking fume extractor, the operation of flued gas appliances should be tested by a competent person to ensure that back flow of combustion gases does not occur.

2. USE

- The extractor hood has been designed exclusively for domestic use to eliminate kitchen smells.
- Never use the hood for purposes other than for which it has been designed.
- Never leave high naked flames under the hood when it is in operation.
- Adjust the flame intensity to direct it onto the bottom of the pan only, making sure that it does not engulf the sides.
- Deep fat fryers must be continuously monitored during use: overheated oil can burst into flames.

3. CARE AND CLEANING

- The Activated charcoal filter is not washable and cannot be regenerated, and must be replaced approximately every 4 months of operation, or more frequently for particularly heavy usage (**W**).

- The Grease filters must be cleaned every 2 months of operation, or more frequently for particularly heavy usage, and can be washed in a dishwasher (**Z**).

- Clean the hood using a damp cloth and a neutral liquid detergent.

4. CONTROLS

BUTTON	LED	FUNCTIONS
T1 Speed	On	Turns the Motor on at Speed one.
		Turns the Motor off.
T2 Speed	On	Turns the Motor on at Speed two.
T3 Speed	Fixed	When pressed briefly, turns the Motor on at Speed three.
	Flashing	Pressed for 2 Seconds. Activates Speed four with a timer set to 6 minutes, after which it returns to the speed that was set previously. Suitable to deal with maximum levels of cooking fumes.
L Light		Turns the Lighting System on and off.

Warning: Button T1 turns the motor off, after first passing to speed one.

5. LIGHTING

- For replacement contact technical support (“To purchase contact technical support”).

Safety Warnings - Range Hoods

SHW610X2 & SHW910X2

- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervised or instruction concerning use of the appliance by a responsible person for their safety.
- Young children should be supervised to ensure that they do not play with the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- Range Hoods and other cooking fume extractors may adversely affect the safe operation of appliances burning gas or other fuels (including those in other rooms) due to lack of back flow of combustible gases. These gases can potentially result in carbon monoxide poisoning. After installation of a range hood or other cooking fume extractor, the operation of flued gas appliances should be tested by a competent person to ensure that back flow of combustion gases do not occur
- There is a risk of fire if cleaning is not carried out in accordance with the instructions.
- Caution: Accessible parts may become hot when used with a cooking appliance.
- Do not flambé under the range hood.

Note: The instructions must include details concerning cleaning instructions and frequency of cleaning

For Installation Instructions:

- The exhaust air must not be discharged into a flue which is used for exhausting fumes from other appliances burning gas or other fuels. (Not applicable for appliances which only discharge air back into the room)
- The minimum distance between the supporting surface for the cooking vessels of the hob and the lowest part of the range hood shall be at least 60cm. If the instructions for installation specify a greater distance, this has to be taken into account.
- Regulations concerning the discharge of air have to be fulfilled.
- Warning: Failure to install the screws or fixing devices in accordance with the instructions may result in an electrical hazard.
- For LED lamp replacement please contact manufacturer or associated service agent

NOTE 1: If the Instruction Manual for installation show any screws that are intended to penetrate the range hood enclosure during installation or for any accessory attachments such as flue attachments, then associated screws marked in the manual must be marked with the size of the intended screw used for use. Usually these screws are provided with the appliance but the manual must indicate the screw size intended to be used for these applications.

EN INSTALLATION MANUAL

Warning! Before proceeding with installation, read the safety information in the User Manual.
