The Prescott Mantel Suite is designed to bring warmth, style, and atmosphere into the heart of your home. Paired with the Redstone electric fireplace, this elegant combination creates the look and feel of a traditional fireplace while offering the convenience and efficiency of modern electric heating technology.

The Redstone fireplace features realistic flame visuals, glowing ember effects, and authentic-style logs that create a cosy and inviting ambience in any room. With adjustable heat settings and the option to operate the flame independently from the heater, the Prescott Mantel Suite can be enjoyed throughout every season. Its sophisticated mantel design and balanced proportions make it a standout feature that blends seamlessly into both contemporary and classic interiors.
