

Model Number	FC74GSWI
Description	Glem 75cm 4 burner Gas Cooktop

Manufactured by Glem Gas in the Modena factory in Italy. The design of the cast iron trivets to the full width of the cooktop maximizes the cooking area. This is a cooktop for the serious cook. On the left hand side there is a dual control wok burner which allows for a simmer rate from 1 Mj/h right up to 16 Mj/h and on the right hand side there is a triple ring wok burner.

The burners have been spaced to allow for stir frying in a wok while cooking rice on the other burner.

This is a 75 cm wide cooktop that still fits into the standard 60cm cut out.

Dual control wok burner - 1 Mj/h to 16 Mj/h range. It has two control knobs, one to control the inner ring and one to control the outer ring.

Flame failure safety devices on all burners - if the flame goes out the gas cuts off.
