size	344mmH x 564mmW x 510mmD (+33mm handle)
capacity	34 litres
turntable	345mm diameter,
power levels	10
auto cook	5 programs
defrost	by time or weight
power output	1000W microwave
consumption	1500W microwave
frequency	2450Hz
convection	2300W maximum
grill power consumption	1600W, ie 800W ceiling, 800W floor
combination heating power consumption	2300W
current	9.6 amp maximum current, suitable for standard 10 amp GPO
warranty	two years parts and labour
package dimensions	395mm x 630mm x 575mm = 0.143m³
weight	23kg gross, 21.5kg net
oven cavity	240mmH x 369mmW x 390mmD = 34.54 litre
power supply	240V, 50 Hz
power cord	1.85 metre
supplied	Ø345mm black enamel turntable Ø295mm 120mm high chrome rack Ø295mm 30mm high chrome rack operating instructions

SCROLLING MAIN CONTROL
Easily set or correct all times, weights and quantities without the pressing of touchpads and/or buttons.

LANGUAGE
For all prompting instructions in the digital display choose one of six languages – English, French, German, Dutch, Italian, or Spanish.

34 LITRE CAPACITY
246mmH x 370mmW x376mmD, note extra height for taller cooking utensils and perfect for the high accessory chrome rack.

345mm WIDE TURNTABLE
Accommodates not only the largest restaurant-style plate, also suits most rectangular and odd-shaped utensils.

1000 WATT MICROWAVE
The perfect maximum power level for the capacity. There are 10 power levels.

ZERO WATT STANDBY
Microwave has no clock function allowing zero power usage when not in use

FAN ASSISTED CONVECTION COOKING
All the advantages of a conventional oven in a compact design. Oven temperature range 40° Celsius through to 250°C. NB There is also a selectable preheat program.

PROVING OVEN
Perfect for proofing home-made doughs with the required 40°C accuracy.

COMBINATION COOKING Five Modes -
• microwave + fan assisted convection
• microwave + fan assisted convection + floor element
• fan assisted convection + grill + floor element
• microwave + grill
• microwave + grill + floor element

AUTOMATIC DEFROST (weight defrost)
4 modes: meat, poultry, fish, bread with weights from 50 grams to 3 kilograms

CAKE and BREAD MAKING
Optionally use the lower chromed rack for weights from 100 grams through to 1.5 kilograms.

GRILLING
The 800W quartz elements recessed into the roof and the use of the taller chrome rack are perfect for toasting, browning and grilling light toppings such as cheese, tomato and pressed meat.

CRUSTY
By using only the base element crispy results are assured. 4 modes — fresh pizza, frozen pizza, fresh gratin, frozen gratin.

AUTO COOK
For nine common food types simply prepare the ingredients, select the category, select the weight and start. There are three meat dishes, a fish selection, larger or small cut vegetables, fresh or frozen vegetables and a casserole choice.

SPEEDY COOK
Automatic full power in 30 second increments to 5 minutes maximum

60 MINUTE
All manual operations have a variable 60 minute maximum timer with countdown stop cook. Some automatic selections are programmed for a deliberate longer duration.

LESS, MORE
According to desired results, increase or decrease cooking or defrosting times in multiples of 1 minute to a maximum 99 minutes.

MANUAL COOLING
The automatic cooling can be adjusted manually to suit certain post-cook resting stages as well as bringing the oven cavity back to ambient temperature more swiftly.

SCROLL SPEED
The rate of information in the display window can be adjusted from slow through to very fast.

MEMORY COOK
Store your must frequently used sequence and reduce your key button and scroll selections to two button selections only ie memory, start.
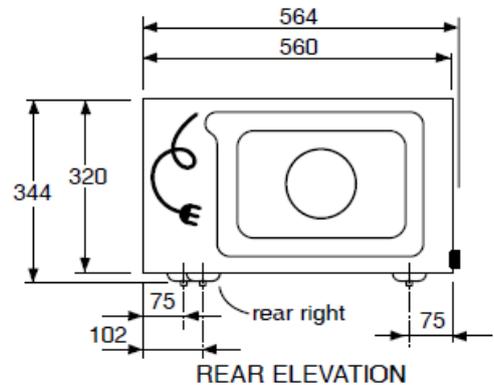

SAFETY LOCK
Electronically the control can be shut down to prevent careless access to any functions particularly by children.
