

Congratulations

on the purchase of your new vacuum cleaner.
You've got removing dry debris from your carpets covered...

Now What?

BISSELL it!

Be prepared for unexpected messes, removing spots, stains and restoring your carpet back to life. Get the dirt and stains vacuums leave behind. Easy to use, a BISSELL Deep Cleaner is there when you need it.

The accumulation of dirt, stains, odours and allergens can cause your carpets, rugs and upholstery to become dull, discoloured and smelly over time.

Regular Deep Cleaning helps remove this build up making your carpets and upholstery appear cleaner, fresher and newer.

Deep Cleaning forces a warm cleaning mixture deep into your carpet to blast out dirt and grime as built-in brushes help remove deeply embedded dirt. At the same time, powerful suction immediately pulls out the dirt and liquid.
