75L Single Convection Oven

Convection Cooking

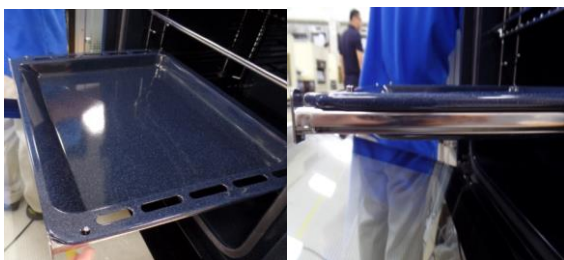

Helps Cook Food Evenly

With Convection Cooking, an integrated fan circulates the hot air around and across the interior, which is designed to cook food evenly, at lower temperatures, for superb and fast results.

Catalytic Cleaning

Keep Oven Clean

With Catalytic Cleaning the food remnant tray is designed to collect grease and residue and chemically dissolve them, helping you to keep your oven clean.

Telescopic Rail

Helps Ensure Stability

The telescopic rail helps to ensure stability and it's detachable so that the user can adjust the height
