VAPORE is the first built-in hood in the world with the ability to avoid condensation that inevitably is created on surfaces and filters of a traditional range hood when it is installed over induction cooktops. Unlike the gas cooktop, induction cooktops only heat the receptacles that contain food and not the surrounding air, therefore the hood surfaces remain cold.

When cooking, hot fumes / steam rises, they then come into contact with the cold surfaces of the hood, releasing the moisture in the air that will turn into water droplets which then inevitably fall onto the underlying surface and onto the food being cooked dragging behind fat and impurities.

This unfortunately is physics and absolutely does not depend on the hood suction capacity, but on the temperature difference between the cooking heat being created and the range hood's cold surfaces.

These droplets also inevitably form inside the hood itself, and over time can cause problems to the electrical and electronic components.

Thanks to this new system, ILVE has resolved one of the most unpleasant and difficult problems in the context of cooking with induction.

From now on every induction hob has found its solution: VAPORE!

Concealed Range Hood

VAPORE 60 & 90

Model VAPORE Series Concealed Hood

- Specifically designed and innovated for use with Induction cooktops
- Filters: stainless steel cover with aluminium filter
- Control: soft touch control
- Water release outlet
- Innovative vapour system prevents water droplets onto the cooking surface
- Lighting: LED
- Max. Air flow (m3/h): 920 net or 1200 gross*
- Ducting Outlet: 150 mm**
- Ducting: duct out or re-circulating***
- Size: 60cm & 90cm
- Available Colour: stainless steel

Type: Concealed Range Hood
Model: VAPORE60 & VAPORE90
Size: 60cm & 90cm
Power standard: 10 Amp plug
Ducting size: 150mm

*Range Hood extraction rate m3/h reading is measured at: 1m duct up, 1 x 90°C bend & 1m vertical duct

**Using the conversion back to 125mm may effect performance

***Optional recirculating kit and accessories are available (consult with ILVE)
