

D754BJB

PRODUCT OVERVIEW

Product group:	Tumble dryer
Installation type:	Freestanding
Line:	Colour Edition - Black
Type:	Condenser tumble dryer
Capacity:	1 – 7.5 kg
Number of programs:	15 programs

EFFICIENCY

Energy-saving electric heater

Drum Volume: 117lt

Drum illumination with LED light

35 cm porthole diameter

180 ° door opening angle

Reversible drum action

Direct discharge of condensate AutoDrain

Energy
Rating

CONTROL

Personal settings for all programmes

LED display

PROGRAMS

15 programs

Cotton, Synthetics, Delicates, Mix,

Wool, XL programme

FEATURES

Audio signal SoftSound

FiltrationSupreme

Drying phase indicator

Signal for "full water container"

Water container 4.95lt capacity

Remaining time on display

Vacuum feet

FUNCTIONS

Lower drying temperature: 40°C-60°C

Anticrease

SENSORIQ TECHNOLOGY

Humidity sensor

Service diagnostic indicator

SAFETY AND DURABILITY

Protective thermostat

Automatic switch off when door is open

Child protection (CDP)

Stainless steel inner/outer drum

TECHNICAL DATA:

Product Dimensions (HxWxD): 85 x 60 x 60 cm

Electrical cord length: 150cm

Gross weight: 40kg

Noise level (max): 65 dB(A) re 1pW

Energy consumption: 291 kWh

EAN Code: 3838942047978

XL programme

A special programme featuring reversible drum rotation prevents the laundry from entangling during drying.

The most efficient way to dry larger pieces of laundry! A special programme featuring reversible drum rotation prevents the laundry from entangling during drying. The XL program will dry larger items such as bedding, blankets, pillows, etc. more evenly and with substantially less creases.

AutoDrain - direct discharge of condensate

No more manual emptying of the condensate tank. If you opt for a condenser dryer instead of the vented dryer, the opening for discharging the vapours from the room is no longer required. In this type of dryer, the steam condenses in a special condensate tank which is simply emptied after each drying cycle. If the condensate tank is connected to a drain through the AutoDrain pipe, the tank no longer has to be emptied manually.

Anti-Crease system to minimise ironing

Anti-Crease system reduces creasing during drying; hence, less ironing is required.

Gorenje dryers feature an Anti-Crease system designed to reduce creasing. The tumble action and special 3D rib design prevent the garments from getting tangled or bundled up, which results in improved drying efficiency. A 10 minute period at the end of the drying cycle slowly cools down the laundry load to further reduce the possibility of creasing. Even when the dryer cannot be emptied immediately, your garments will not settle or crease by virtue of automatic, periodic tumbling of the load for a minimum of one hour after the cycle has finished.

FiltrationSupreme

Gorenje tumble dryer features 40 % higher filtration efficiency due to optimal position and size of filters. Due to optimal humidity level and temperature, tumble dryer's door is the most suitable position for filter since most of the particles linger in the door area.
