clothes dryers

electrolux clothes dryers

Electrolux clothes dryers offer thoughtful and innovative features to suit your lifestyle. With large capacities, auto-sensing technology, anti-creasing and delay start options you get to spend less time in the laundry and more time on life.

model EDV605S shown

auto-sensing

Sensor drying technology detects the level of moisture in the garments and selects the optimum drying time accordingly. This improves energy efficiency and protects clothes against damage caused by over-drying.

anti-creasing

The crease-free option gently rotates the clothing back and forth for at least 30 minutes (depending on the model) after the drying cycle has ended to minimise wrinkles, reducing the need for ironing.

ease of use

With features like a front lint filter, a clean lint filter LED, an LED progress indicator and a delay start option, these dryers make doing laundry less of a chore.

comfortable environment

The EDC66150W & EDC47130W condenser dryers prevent hot moist air from being blown into the laundry – ideal for apartment living or any situation where the ventilation of exhaust air outside is not possible.
