### EverFresh+ Compartment

Enjoy maximum freshness.

Beko refrigerators with the newly designed EverFresh+® compartment help minimize humidity loss and stabilize the temperature control via air channels. EverFresh+® provides the best conditions for your fruits and green vegetables to maintain their freshness longer, providing up to 30 days of storage time.

### Active Fresh Blue Lights

Beko Active Fresh Blue Light™ technology ensures that the process of photosynthesis continues in the refrigerator prolonging the storage life of fresh fruit and vegetables while maintaining their natural flavours and nutritional elements.

### NeoFrost™ Dual Cooling

Stay green and eat fresh.

Beko NeoFrost™ refrigerators feature two separate cooling systems, helping keep humidity at an optimum level, preventing odour transfer between the fridge and the freezer, maintaining the maximum level of air quality. NeoFrost™ technology provides the best cooling conditions to help keep your favourite foods as fresh as you love them.

### IonGuard™

The active ioniser neutralises bacteria, viruses and particles in the refrigerator. The circulated air inside the refrigerator is kept clean and food can be stored for a longer period.
