

SA20XMFR8 smeg 90cm wallmount oven

MULTIFUNCTION

GT379 telescopic shelf racks

EAN 8017709126605

finish	satén stainless steel
size	480mmH x 896mmW x 566mmD
capacity	90 litre
installation	underbench or wall, flushmount or proudmount
thermostat	variable, 0–250°C
multifunction	ten cooking functions plus defrost
fully programmable	24-hour digital, time of day, fully automatic, semi automatic, minute minder, manual override
cooling system	independent self-cooling carcass fan
furniture	baking/grill tray, 2x chromed-wire shelves, 2x safety grip grill tray handles, 2x non-stock trays, removable roof liner, rotisserie attachment
interior enamel	Ever Clean enamel
catalytic liners	fitted, set of three, CC/70/90 code 9970/90, replaceable
telescopic shelf racks	optional set of three GT379
safety	thermal overload protection, safety-notched furniture, double-glazed door, forced-air door cooling, thermo-reflective panes
warranty	two years parts and labour

SMEG THERMOSEAL

Unique to Smeg is the fully sealed, non-venting oven. This sealing ensures full capacity loading, and maintains oven temperature more accurately.

NON VENTING

There is no transference of cooking vapours to the kitchen, resulting in a cooler working environment and cleaner, longer-wearing kitchen cabinet surfaces.

SELF SUFFICIENCY

The thermoseal ensure cooking does not require the addition of fluids (fats, oils) to maintain a moist cooking environment; nor does the oven require attention — that is, turning, basting or repositioning while grilling, roasting or baking.

MAXIMUM EFFICIENCY

Sustainable temperatures and higher capacities combine with virtual 'hands free' cooking in a non-polluting, non-venting system, delivering both a costing and lifestyle efficiency.

FULLY AUTOMATIC

The SA20XMFR can be preprogrammed to start and finish cooking. It is also semi automatic in that the cooking is started manually and then programmed to finish at a set time. There is also the 'minute minder', variable up to 23 hours and 59 minutes. This simply counts down to an audible signal (with volume variability) — a reminder call to return to the oven for, perhaps, a cooking adjustment. These timing applications help ensure perfect cooking results and, importantly, peace of mind.

REMOVABLE ROOF LINER

Also uniquely Smeg is the removable vitreously-enamelled roof liner over the grill elements. Normally this is the most inaccessible and difficult area of an oven to clean. Now, simply slide this liner out for easy wiping over.

CATALYTIC WALL LINERS

These panels are included accessories as a set of three and are fitted over the side and rear walls. They absorb airborne grease/oil/food particles throughout the cooking process to eventually carbonise this organic waste. Maintenance is then made even easier.

SAFETY COOLING

An independent fan sources air from the kitchen and passes this air through the control panel and then around the carcass of the oven, exiting at the lower front of the oven back into the kitchen. The triple-glazed door, in unison with the cavity cooling system, ensures all external surfaces are safe to touch.

DOUBLE GLAZING

Two layers of thermo-reflective glass ensure the heat generated within the oven cavity is contained and efficiently used. Radiant heat to the outside (ie the kitchen) is kept to a minimum. The double glazing is assisted by forced cool air between the panes, further reducing any possible heat radiance and ensuring safe-to-touch surfaces.

REMOVABLE DOOR

Easily removed, this robust door allows wipe-over maintenance away from the oven. When removed, more ergonomic access to the oven cavity is possible for easy cleaning.
