# Projection Screens

Motorised Projection Screen

We are pleased to announce our latest release with this new Australian Made projection screen, that has the simple rugged qualities and consistency in quality that will make it a strong player in the commercial market place.

Never before has the market seen a locally made screen at this price point, with a 4 core tubular motor, full electrical kit and 3 position rotary wall switch, this screen is well priced and more importantly…bullet proof.

Fully integrated RF Remote Control is a neat stand alone option for those wanting wireless control, in environments that don't require systems integration.

Specification and pricing subject to change without notice.

4 Core Wall Switch	RF Remote Control	Inch Diag	Viewing Size	Format
