15 Wash Programs : Cotton/ Cotton Eco, Synthetic, Delicates, Soak, Mixed, Bedding, Wool, Shirts, EcoNavi, 49 Min Active Speed, Quick 30, Rapid 15, Hygiene, Tub Clean

ECONAVI Technology

ECONAVI

ECONAVI detects water temperature, wash load amount, laundry material and automatically adjusts operation to save energy, water, and time by eliminating waste.

1. **Wash Load Sensor**
2. **Water Temperature Sensor**
3. **Laundry Material Sensor**

INVERTER

The Inverter compressor helps to minimise energy loss and offers a quieter operation

1. **Optimal & smooth control of motor rotation speed**
2. **Quiet Operation**

The 3D Sensor constantly detects how clothes move and automatically controls drum rotation.

Tub Clean

The Tub Clean Function removes stains from the inner wall of the outer tub, to avoid bacterial growth 40°C Wash.

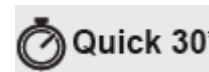

ActiveFoam

SYSTEM

Turns detergent into fine foam at the beginning of the wash cycle to maximise detergent power and thoroughly remove dirt quickly. Reduces the chance of residual undissolved detergent on clothes.

Fast washing in just 49 min with fine, high-density foam. Ideal for a small load up to 5Kg.

30 min quick wash option for lightly soiled cotton and linen blends. Ideal for a small load up to 5Kg.

15 min full rapid wash for a small amount of lightly soiled items.

Hygiene | 60°C | 90°C

Washing clothes with hot 60°C/90°C water helps to remove bacteria and allergens that can irritate sensitive skin. This ideal for washing babies' items such a babies' clothes, towel, bedding and sports wear.
