### Air Purified

Bellaria is an innovative air purifying device which re-establishes a healthy balance in indoor atmosphere, thanks to its active ionization system, getting rid of odours and other harmful substances. Watch the air quality change with the leaf icon, which displays that purity of the air.

The inner working of Bellaria take their roots on patented E.Ion technology by Falmecc, which releases ions indoors in a pristine atmosphere-like concentration.

Bellaria is also versatile, with an additional lamp function, and a quiet, brushless motor, making it the perfect addition to any living space. A hand made murano glass shell gives it a personal and stylish touch. Quality is assured with the Bellaria, with the filters and ionizers lasting up to 10 years without needing to be changed.

Bellaria won the Silver Prize, in the 'Wellness and Relaxation Products' category, at the European Product Design Award contest, which every year honors the best products in term of features, innovation and environment-friendliness.

### Technical Drawing

Model Code	Colour	Size	No. Of Speeds	Finish
BRGL24G1◀	Grey	(W) 239 x (H) 272 x (D) 257mm	3	Glass
