## OR914CXA

# 90cm chimney rangehood, wallmount, stainless steel with glass canopy

size 900mmW x 480mmD x 823mmH maximum

finish stainless steel and glass
capacity 710m³/hr net, 923m³/hr gross

installation wallmount

NB: can be ducted direct to atmosphere

or recirculated to kitchen

**ducting** 150mm diameter ducting material required

**motor** 198 watt centrifugal, twin impellors

**illumination** 2 x 20-watt halogen globes, separate flush

buttons

speeds three, separate flush buttonsdelay stopfiltration single 4-ply aluminium grease filter —

removable, washable

**noise rating** 34–56 dBA maximum

power cable 1.65 metre current 1.0 amp

warranty two years parts and labour

#### **PERFORMANCE**

With a true net air extraction of 710m³/hr net an hour, the more vigorous styles of cooking, such as pasta boiling, griddle and stir frying, are catered for. At the touch of the speed control, the power can be switched down for the gentlest of simmers.

#### LOW MAINTENANCE

Easy cleaning is a premium with wipe-over 18/10 grade stainless steel surface. Two lift-out stainless steel and aluminium four-ply grease filters can be hand washed. The lighting and speed controls are underslung and forward away from most of the vapour trail and there is easy access to the twin light alobes.

#### QUIETNESS

34 to 56 dBA. The motor/impellor encasement and internal flue are smooth-walled to eliminate air drag and noise, hand-finished welded metal joins for no vibration.

#### **SAFETY**

Thermal overload protector or motor; fire-retardant hardened metal and mesh. VO self-extinguishing polycarbonate for motor housing and internal flue.

#### **DUCTING THE AIR DIRECT TO ATMOSPHERE**

Ideally, the filtered air is removed from the kitchen and household to the outside of the building. This method of rangehood installation ensures maximum removal of the heat, vapours, odours and particle-laden air.

#### RECIRCULATING THE AIR TO THE KITCHEN

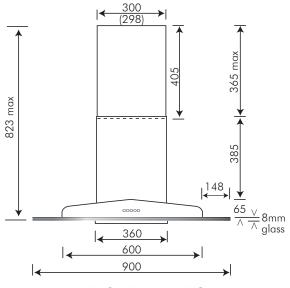

When it is structurally impossible to duct the filtered air to the outside of the building, the filtered air is vented back into the kitchen via the recirculation vents in the side of the chimney. A more frequent inspection and washing of the metal grease filters is recommended for this mode of installation.

The easily-removable grease filters will isolate most of the grease, oil and food particles. These filters are washable using warm, soapy water or medium dishwasher program.
