EverFresh+ Compartment

Enjoy maximum freshness.

Beko refrigerators with the newly designed EverFresh+® compartment help minimize humidity loss and stabilize the temperature control via air channels. EverFresh+® provides the best conditions for your fruits and green vegetables to maintain their freshness longer, providing up to 30 days of storage time.

Active Fresh Blue Lights

Beko Active Fresh Blue Light™ technology ensures that the process of photosynthesis continues in the refrigerator prolonging the storage life of fresh fruit and vegetables while maintaining their natural flavours and nutritional elements.

NeoFrost™ Dual Cooling

Stay green and eat fresh.

Beko NeoFrost™ refrigerators feature two separate cooling systems, helping keep humidity at an optimum level, preventing odour transfer between the fridge and the freezer, maintaining the maximum level of air quality. NeoFrost™ technology provides the best cooling conditions to help keep your favourite foods as fresh as you love them.

IonGuard™

The active ioniser neutralises bacteria, viruses and particles in the refrigerator. The circulated air inside the refrigerator is kept clean and food can be stored for a longer period.
