TEST 2*

Flinders St Station 698m

EXCELLENT SIGNAL STRENGTH

Uniden®

XDECT

EXTENDED DIGITAL

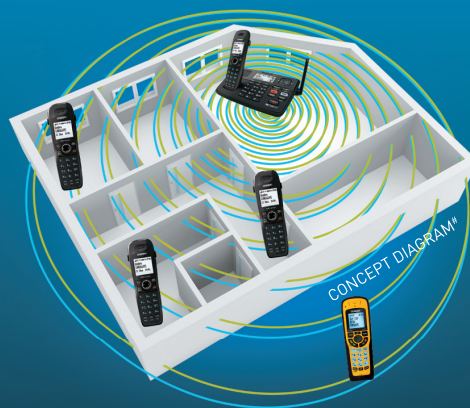

The New Benchmark in Long Range Cordless Phone Communication

Uniden's XDECT Digital Cordless Phones Offer Extended Digital Coverage by utilising a:

- Diversity Antenna System for Optimal Reception and Clarity – by mitigating multi-path errors
- High Gain Antenna for greater range and to eliminate drop out areas in your home

How does the Diversity Antenna System work?

When there is not a clear line-of-sight between the phone base and the handset, the signal can be reflected along multiple paths before being finally received. Uniden's Advanced Diversity Antenna System is able to transmit multiple signals for maximum coverage and differentiate between these multiple signals to utilise the best and clearest signal for optimal reception and clarity.

Advanced LCD & Caller ID Display^

- 4 Line Backlit Full Dot Matrix LCD Display
- White Backlit LCD Display on Base & Handset
- POP ID^ – Caller Name Identification
- 50 Caller ID^ Memories and 100 Phonebook Entries
- Polyphonic Ring Tones
- Caller ID^ (Type 1 & Type 2)

Multi Handset Capabilities#

- Up to 12 Handsets using the One Phone Socket
- Intercom / Announce Call Transfer

Call Block^

- When call block is on and the incoming number matches a number in the call block memory the phone will answer the call and announce "no one is available to take your call" then hang up.
