## Double Built-in Oven, 60cm 45L + 71L, 7 Function

This Fisher & Paykel 60cm, 45L + 71L double built-in oven with seven functions allows you to use one or both oven cavities simultaneously.

Brushed Stainless Steel

### Dimensions

Depth	567mm
Height	<sup>A</sup> 888mm
Width	<sup>B</sup> 595mm

### Features & Benefits

#### Oven functions

This built-in oven has seven functions with pre-set temperatures, including Bake, Fan Bake and Fan Forced allowing you to use a variety of cooking styles.

#### Sized to suit

This built-in oven provides a generous 71L + 45L of total capacity across two cavities providing enough space to fit a large casserole dish, the family roast and a pie for dessert.

#### Easy cleaning

This built-in oven has catalytic liners that break down oil and fat splashes during cooking so you don't have to spend hours cleaning.

#### Safe and sound

The CoolTouch door with triple glazing and cooling system is safe to touch from the outside, protecting your hands and the surrounding cabinetry.

#### Designed to match

With their premium handle styling and stainless steel finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

#### Accessories

This built-in oven comes with a number of handy accessories including a fat filter, flat brushed baking tray and a grill rack.

#### Bake

The Bake function radiates heat from the top and bottom of the oven whilst natural convection currents evenly distribute heat. Moisture is retained to provide light, succulent dishes. For best results, only bake on one shelf at a time.

#### Fan Bake

Fan Bake generates heat at the top and bottom of the oven, with the fan creating airflow throughout. The increased airflow speeds up cooking so oven temperatures can be lowered by 20oC for most recipes. Ideal for baking biscuits, muffins and cakes.

#### Fan Forced

The Fan Forced function is great for multi-shelf cooking. Heat is generated at the rear of the oven and is distributed evenly throughout by the fan.

#### Fan Grill

The intense heat and radiation of the Fan Grill function works well for cooking large cuts of meats, so they are moist inside and crisp on the outside.

#### Grill

The Grill function delivers intense heat from the inner region of the top element when you need to quickly grill one or two portions. Perfect for cooking crispy chicken breast, steak and fish. The intensity can be finely controlled; 'HI' is ideal for quick surface browning.

**Warm**

Warm is limited to very gentle temperatures. It isn't intended as a cooking function but is designed to keep food warm and limit the progression of cooking. Using the oven's specialised LO Warm setting takes the guesswork out of proving dough.

Specifications
