Removable Cool Glass Door

Our oven doors feature multiple layers of glass that keep heat locked inside, providing more efficient cooking and keeping the outside of the oven cool and safe to touch. Each layer can be easily removed when cleaning is needed.

Durastone Plus Enamel

The oven cavity is made from our Durastone Plus enamel. This enamel has a higher glass content. The smooth surface reduces fat and oil build up. Cleaning is as quick as a wipe with a cloth soaked in a small amount of dishwashing liquid after each use.

Multifunction cooking

Both ovens use a combination of upper and lower elements together with the fan, and when the fan is engaged, different foods such as fish, cake and meat, can be cooked together without the transfer of flavours.
