Compact Dehumidifier
ION681

Excessively humid air in your indoor area can cause or increase the growth of various pathogenic pests, including mould and mildew. The Ionmax ION681, Compact Dehumidifier, is designed to remove excess moisture from small to medium indoor areas. With Thermoelectric Peltier technology, the ION681 Dehumidifier gives the added assurance of protecting indoor air quality and preventing damage to your home's infrastructure caused by excessive humidity. It can also be used to help with the drying of wet clothes indoors.

The ION681 Dehumidifier helps to generate fresh, dry air back into your home to give you better comfort all year round.

Features

Thermoelectric Peltier Technology
