

360° Hydrapower Iron range

Panasonic 360° Hydrapower range
NI-W950ALSJ

Key Features & Benefits

Unique features combine to reduce ironing time, such as the scratchproof double headed Alumite Multi-Directional Soleplate with 360° steam for more precise movements. The unique curved soleplate glides easily, making it light work for wrists and arms without compromising on performance.

The soleplate of the Panasonic NI-W950 is made from Alumite (anodized aluminium) which is also used in the construction of automobile engines, helping to prevent wear and tear of parts. The W950's design borrows from this principle in making the 360° Quick Multi-Directional Soleplate scratch-proof.
