## Dimensions

Depth	670mm
Height	850mm
Width	600mm

## Features & Benefits

### 18 fabric care cycles

Intuitive controls with clever drying hints help you get the best results. Easy to use, the LCD display provides a simple interface to select from 18 dry cycles; including Ultra-delicate for lace; Outdoor for high performance fabrics; a Warm-up cycle for towels; Jeans for everyday essentials; and Soft Toys for those special items.

### Heat Pump Technology

Heat pump technology dries at lower temperatures for gentle fabric care and because moisture is condensed, no venting is required. This is an ideal dryer for laundries where venting is difficult as it can be placed almost anywhere in the home.

### Auto-sensing technology

Auto-sensing technology measures moisture inside the drum, shutting off at the perfect time to avoid over-drying your clothes, helping them last longer and reducing energy wastage.

### 8 star energy rating

This dryer uses heat pump technology to gently and effectively dry clothes at low temperatures, and achieves an 8 star energy rating compared to our DC8060P1 8kg condensing drier with a 2 star energy rating.

### Too precious to tumble?

The drying rack is designed for items that can't be tumble dried. It fits easily into the dryer and delivers the perfect result for those precious delicates, shoes and toys.

## Designed to match

The Heat Pump dryer and our ActiveIntelligence™ washing machine are designed to match. With outstanding aesthetics and complimentary wash and dry cycles, they are the perfect pair to deliver complete fabric care.
