ICF-C11IP/BLK

Powerful alarm clock dock functionality for Apple® devices with Lightning™ connector.[1] Automatic time set with backup battery ensures easy alarm setup and reliable functionality even during a power interruption, while dual 2-5-7 day alarms start your day off right, waking you with either: iPod®/iPhone®, AM/FM radio, or even the buzzer.

Music your way

Gently fall asleep or wake up to your iPod®, iPhone®, buzzer, or radio.[1]

Dock for Apple® devices with Lightning™ connector[1]

Dock, listen and charge your Lightning™ connector compatible iPod® and iPhone® via the durable and easy to use Flexi-dock1. Compatible with the iPhone® 5, it also accommodates many cases so you can plug and play. When not using the Flexi-dock, snap the spring-loaded cover shut for a clean look.

Alarm Flexibility

Dual alarms can be activated independently of one another, and can also be set as a 2-5-7 day alarm to differentiate weekend and weekday settings.

LCD Brightness Control

Easily adjust LCD brightness to one of four settings to suit your preference.

No Power, No Problem

An optional backup battery keeps the clock and alarm functional, even during a power interruption.

Easy, Automatic Time Set

Pre-set at the factory to current EST (Eastern Standard Time), all you need to do when setting up the unit is to plug it in and set the correct time zone. Even better, the built-in calendar even recognizes the date, automatically adjusting for Daylight Savings or Standard Time.

Enjoy AM/FM radio programming

A built-in digital AM/FM tuner with 30 station presets lets you choose from a wide variety of radio, talk and music programming.

Control your tunes with remote control

Control your iPod® or iPhone®[1] from across the room with the included full-function remote control.

Plays well with others...

An auxiliary audio input lets you connect digital music players to the speaker dock for easy access to your music (cable not included).

Free Sony® D-Sappli™ App available

A free Sony® App (D-Sappli™), available at iTunes®, enables expanded speaker functionality when using an Apple® device with the following features: an enlarged clock display, a music play timer, and a sleep timer.[2]

Specifications

Audio
