Dear Customer,

Congratulations on purchasing your new product from Think Appliances.

To register your parts and labour warranty (some conditions apply please refer to your warranty card for more details) please contact our Customer Care team on:

1800 444 357

Our Customer Care centre is there to ensure you get the most out of your appliance. For example, should you want to learn more about recommended cooking temperatures, the various cooking functions available, how to set and program your LED clock, and importantly taking care of your appliance when cleaning, please call us because we are here to help you.

It is important that you read through the following use and care manual thoroughly to familiarize yourself with the installation and operation requirements of your appliance to ensure optimum performance.

We also carry a complete range of spare parts for all Think products. For all your spare parts enquiries please contact our team at Pronto Parts on:

1300 306 973

Again, thank you for choosing an appliance brought to you by Think Appliances and we look forward to being of service to you.

Kind regards

Management

Think Appliances

Environmental note

- The packaging materials that Baumatic uses are environmentally friendly and can be recycled.
- Please discard all packaging material with due regard for the environment.

IMPORTANT SAFETY INFORMATION

Your safety is of the utmost importance to Baumatic. Please make sure that you read this instruction booklet **before** attempting to install or use the appliance. If you are unsure of any of the information contained in this booklet, please contact the Baumatic Technical Department.

General Information

- This appliance is designed for domestic indoor household use only and can be built into a standard kitchen cabinet or housing unit.
- **IMPORTANT:** The adjacent furniture or housing and all materials used in the installation **must** be able to withstand a minimum temperature of 85°C above the ambient temperature of the room it is located in, whilst in use.
- Certain types of vinyl or laminate kitchen furniture are particularly prone to heat damage or discolouration at temperatures below the guidelines given above.
- Any damage caused by the appliance being installed in contravention of this temperature limit, or by placing adjacent cabinet materials closer than 4mm to the appliance, **will be the liability of the owner.**
- For use in **leisure accommodation vehicles**, please refer to the appropriate information given in the installation instructions for this appliance.
- The use of this appliance for any other purpose or in any other environment without the express agreement of Baumatic Ltd. will invalidate any warranty or liability claim.
- Your new appliance is guaranteed against electrical or mechanical defects, subject to certain exclusions that are noted in Baumatic's Conditions Of Guarantee. The foregoing does not affect your statutory rights.
- **Repairs may only be carried out by Baumatic Service Engineers or their authorised service agent.**

WARNING

To ensure the oven shelves operate safely, correct placement of the shelves between the side rails (items 1 to 4) is imperative. This will ensure that during removal of the shelf or tray, hot food items should not slide out completely.

Warning and safety instructions

- This appliance complies with all current European safety legislation. Baumatic do wish to emphasise that this compliance does not remove the fact that the appliance surfaces **will become hot during use and retain heat after operation.**

Child Safety

- Baumatic strongly recommend that babies and young children are prevented from being near to the appliance and not allowed to touch the appliance **at any time.**
- If it is necessary for younger family members to be in the kitchen, please ensure that they are kept under close supervision at all times.

General Safety

- **Do not** place heavy objects on the oven door or lean on the oven door when it is open, as this can cause damage to the oven door hinges.
- **Do not** leave heated oil or fat unattended, as this is a fire risk.
- **Do not** place pans or baking trays directly on the base of the oven cavity, or line it with aluminium foil.
- **Do not** allow electrical fittings or cables to come into contact with areas on the appliance that get hot.
- **Do not** use the appliance to heat the room it is located in or to dry clothing.
- **Do not** install the appliance next to curtains or soft furnishings.
- **Do not** attempt to lift or move cooking appliances by using the oven door or handle, as this may cause damage to the appliance or result in injury to the person lifting the appliance.

Cleaning

- Cleaning of the oven should be carried out on a regular basis.
- Great care should be taken whilst using this appliance and when following the cleaning procedure.
- **IMPORTANT:** The appliance must be disconnected from the mains before following the cleaning procedure.

Installation

This appliance must be correctly installed by a suitably qualified person, strictly in accordance with the manufacturer's instructions.

- **Baumatic Ltd. declines any responsibility for injury or damage, to person or property, as a result of improper use or installation of this appliance.**
- Heat, steam and moisture will be created during use of the appliance, take care to avoid injury and ensure that the room is adequately ventilated. If the appliance is going to be used for prolonged periods of time, then additional ventilation may be required.
- Please consult with your qualified installer if you are in any doubt about the amount of ventilation that you will require.

Declaration of conformity

- In the parts destined to come into contact with foodstuffs, this appliance is in accordance with the requirements of the EC directive 89/109 transposed in the Italian Legislative Decree No. 108 of 25/01/92.
- **CE:** Appliance conforming to the European directives 89/336/EEC, 93/68/EEC, 73/23/EEC and subsequent revisions and "RoHS" directive 2002/95/CE.*
- The appliance conforms to Australian Standards AS/NZS60335, parts 1 and 2.6
- The manufacturer declares that the oven is built using certified materials and requires the appliance to be installed in accordance with the standards currently in force. This appliance must be used by a trained person for domestic purposes only.
- * The RoHS directive stands for "the restriction of the use of certain hazardous substances in electrical and electronic equipment". This directive bans the placing on the EU market of new electrical and electronic equipment containing more than the agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants.

|  | ON/OFF button |
|  | Minute minder button |
|  | Manual operation button |
|  | End cook button |
|  | Minus button |
|  | Plus button |

Setting and using the oven programmer/timer

Setting the time and selecting manual operation mode

After your appliance is connected to your mains supply for the first time, the numbers on the timer display will flash. Before you can select a cooking function or set a temperature, you must set the time and put the appliance into "manual operation" mode.

- Press the manual operation button and end cook button simultaneously and then release them. Two dots on the timer will flash.
- Within 3 seconds of releasing the buttons, use the plus and minus buttons until the time in the timer display reaches the time of day.
- Once you have released either the plus or minus buttons, after 3 seconds the two dots on the timer display will stop flashing and the time of day will be set.
- The manual operation symbol will appear on the timer display.

Setting the minute minder function

You are able to set the minute minder, regardless of whether an oven function has been selected. You can set a period of time using the minute minder function and an alarm will sound when this period of time has elapsed.

- Press and release the ON/OFF button and you will hear an audible signal. The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on.
- Press the minute minder button and the timer display will reset to zero and two dots will start flashing.
- Within 3 seconds press the plus and minus buttons to set the countdown period that you require.
- Once you have released either the plus or minus buttons, after 3 seconds the two dots on the timer display will stop flashing. The timer symbol will appear on the timer display.

- When the countdown period has elapsed, an audible signal will sound and the timer symbol will flash on the timer display. To turn off the audible signal and return the oven to manual operation, press any of the timer buttons (apart from the ON/OFF button).
- **Important:** The oven will continue to heat once the audible signal has been silenced. If you have finished cooking, then you switch the oven off, using the ON/OFF button.

Setting the duration function

This function will allow you to set a countdown time similar to the minute minder function. However the oven will no longer continue to heat, once the countdown period has elapsed.

- Press and release the ON/OFF button and you will hear an audible signal. The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on.
- Press and release the manual operation button, on the timer display the A symbol will appear. Within 3 seconds press the plus and minus buttons to select the required cooking time. The maximum cooking period that you can select is 10 hours.
- After releasing the plus and minus buttons, wait until you hear an audible signal and the timer display again shows the current time.
- Use the oven function selector buttons to choose the cooking function that you want to use. The cooking function lights will show which function you have currently selected. The manual operation symbol will appear on the timer display.
- The oven will suggest a preset cooking temperature; however it is possible to adjust the temperature by using the temperature selection buttons.
- At the end of the set time period, an audible signal will sound; the temperature display and the cooking function light will switch off. The timer display will show the current time, the manual operation and A symbols will flash. The oven will no longer heat.
- To turn off the audible signal and return the oven to manual operation, press any of the timer buttons (apart from the ON/OFF button). The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on. You can then select a new cooking function or to switch the oven off using the ON/OFF button.

Setting the end cook function

This function is similar to the duration function, however instead of selecting a period of time that you wish the oven to switch off after. You select the time of day that you wish the oven to switch off at.

- Press and release the ON/OFF button and you will hear an audible signal. The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on.
- Press and release the end cook button, on the timer display the A symbol will appear. Within 3 seconds press the plus and minus buttons to select the time of day that you want the oven to switch off at.
- After releasing the plus and minus buttons, wait until you hear an audible signal and the timer display again shows the current time.
- Use the oven function selector buttons to choose the cooking function that you want to use. The cooking function lights will show which function you have currently selected. The manual operation symbol will appear on the timer display.
- The oven will suggest a preset cooking temperature; however it is possible to adjust the temperature by using the temperature selection buttons.
- When the time of day that you set the oven to switch off at has been reached, an audible signal will sound; the temperature display and the cooking function light will switch off. The timer display will show the current time, the manual operation and A symbols will flash. The oven will no longer heat.
- To turn off the audible signal and return the oven to manual operation, press any of the timer buttons (apart from the ON/OFF button). The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on. You can then select a new cooking function or to switch the oven off using the ON/OFF button.

Setting the start and end time function

This function will allow you to set a time in the future that the oven switches on at and a time that the oven will switch off at.

- Press and release the ON/OFF button and you will hear an audible signal. The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on.
- Press and release the manual operation button, on the timer display the A symbol will appear. Within 3 seconds press the plus and minus buttons to select the length of time that you want the oven to cook for.
- An audible signal will sound and the timer display will show the current time. Press the end cook button and within 3 seconds press the plus and minus buttons to select the time of day that you want the oven to switch off at. After releasing these buttons the audible signal will sound again and the two dots on the timer display will stop blinking.
- Use the oven function selector buttons to choose the cooking function that you want to use. The cooking function lights will show which function you have currently selected. The manual operation symbol will appear on the timer display.
- The oven will suggest a preset cooking temperature; however it is possible to adjust the temperature by using the temperature selection buttons.
- The oven will automatically work out the time that it needs to switch on at. When it is cooking, you can adjust the oven temperature and cooking function by pressing the relevant buttons.
- When the time of day that you set the oven to switch off at has been reached, an audible signal will sound; the temperature display and the cooking function light will switch off. The timer display will show the current time, the manual operation and A symbols will flash. The oven will no longer heat.
- To turn off the audible signal and return the oven to manual operation, press any of the timer buttons (apart from the ON/OFF button). The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on. You can then select a new cooking function or to switch the oven off using the ON/OFF button.

IMPORTANT: It is not possible to use any of the timer functions (apart from the minute minder) with the defrost oven function.

Cancelling an automatic cooking function

If an automatic cooking function has been set and you wish to use the oven in manual operation mode, you will need to cancel the automatic cooking function.

- To select manual operation mode, press the manual operation button and end cook buttons simultaneously.
- The oven will continue to heat on the cooking function and oven temperature that was previously selected.
- You can select a different cooking function and oven temperature by using the relevant buttons. Or you can switch the oven off by pressing the ON/OFF button.

Adjusting the audible signal

- Turn the oven off using the ON/OFF button, then press the minus button. Each touch of the minus button will cause a different level of audible signal to sound. When it has reached the signal level that you want, simply release the minus button and that signal level will be set.

Selecting a cooking function and temperature

Turning the oven on and selecting an oven function

- Press and release the ON/OFF button and you will hear an audible signal. The timer display will show the word ON, the bulb symbol will light and the internal oven light will come on.
- Use the oven function selector buttons to choose the cooking function that you want to use. The cooking function lights will show which function you have currently selected. The manual operation symbol will appear on the timer display.
- The oven will suggest a preset cooking temperature; however it is possible to adjust the temperature by using the temperature selection buttons.
- When selecting an oven function, the oven cavity light will turn on.

- The oven will start to heat and a centigrade degree symbol (°) will flash in the temperature display.
- When the oven temperature that you have selected has been reached the (°) symbol will stop flashing and the oven will beep.
- **You should not place food inside the cavity, until the correct cooking temperature has been reached.**

10 oven functions

OVEN LIGHT: The oven cavity light will switch on when the oven is switched on. It will remain on whilst the oven is heating to the selected temperature and for a further three minutes once the desired temperature has been reached. To turn the oven light on again, press any of the timer buttons (apart from the ON/OFF button). The light will then switch on for 1 minute.

PRH: This function allows to heat up the oven before choosing a cooking function.

CONVECTION OVEN (top and lower element): This method of cooking provides traditional cooking, with heat from the top and lower elements. This function is suitable for roasting and baking on one shelf only.

LOWER ELEMENT ONLY: This method of cooking uses the lower element to direct heat upward to the food. This function is suitable for slow-cooking recipes or for warming up meals.

TOP ELEMENT ONLY: This method of cooking uses the outer part of the top element to direct heat downwards onto the food. For gentle cooking, browning or keeping cooked dishes warm.

CENTRE GRILL: This method of cooking utilises the inner sections of the top element, which directs heat downwards onto the food. This function is suitable for grilling portions of bacon, toast and meat etc.

CENTRE GRILL AND FAN: The top centre heating element is turned on and its heat is distributed by the fan resulting in perfectly grilled meat without the need to turn. It is ideal for small cuts such as chicken pieces and racks of lamb.

PIZZA FUNCTION: This method of cooking uses the lower and circular element while the heat is distributed by the fan, reproducing the same conditions of traditional clay wood-fire stoves.

FAN OVEN: This method of cooking uses the circular element while the heat is distributed by the fan. This results in a faster and more economical cooking process. The fan oven allows food to be cooked simultaneously on different shelves, preventing the transmission of smells and tastes from one dish onto another.

DEFROST MODE: The fan runs without heat to reduce the defrosting time of frozen foods. The time required to defrost the food will depend on the room temperature, the quantity and type of food. Always check food packaging for the defrosting instructions.

Cooking guidelines

- Please refer to the information given on food packaging for guidance on cooking temperatures and times. Once familiar with the performance of your appliance, temperatures and times can be varied to suit personal preference.
- If you are using the fan oven function, then you should follow the information given on the food packaging for this particular mode of cooking.
- Make sure that frozen foods are thoroughly thawed before cooking, unless the instructions on the food packaging advise that you can “cook from frozen”.
- You should pre-heat the oven and not place food inside of it until the oven operating light has gone off. You can choose not to pre-heat when using the fan oven mode; however you should extend the cooking time given on the food packaging by approximately ten minutes.
- Before cooking, check that any unused accessories are removed from the oven.
- Place cooking trays in the centre of the oven and leave gaps between the trays to allow air to circulate.
- Try to open the door as little as possible to view the dishes.
- The oven light will remain on during cooking.

Warnings

- Keep the oven door closed when using a grill function.
- Do not use aluminium foil to cover the grill pan or heat items wrapped in aluminium foil under the grill. The high reflectivity of the foil could potentially damage the grill element.
- You should also never line the base of your oven with aluminium foil.
- During cooking, never place pans or cookware directly onto the bottom of your oven. They should always be placed on the shelves provided.
- The grill heating element becomes extremely hot during operation, avoid touching it inadvertently when handling the food which you are grilling.
- **Important:** Be careful when opening the door, to avoid contact with hot parts and steam.
- The drip tray handle should only be used to reposition the drip tray and **NOT** for removing it from the oven cavity. When removing the drip tray, you should **ALWAYS** use an oven glove.
- The drip tray handle should not be left in position when the appliance is switched on.

Cleaning and maintenance

Cleaning operations must only be carried out when the oven is cool.

The appliance should be disconnected from your mains supply before commencing any cleaning process.

- The oven should be thoroughly cleaned before it is operated for the first time and after each use. This will avoid residual food stuffs becoming baked on the oven cavity. After residues have been baked on several times, they are far more difficult to remove.
- **Never** clean the oven surfaces by steam cleaning.
- The oven cavity should only be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- Any stains that may appear on the bottom of the oven will have originated from food splashes or spilt food, these splashes occur during the cooking process. These could possibly be a result of the food being cooked at an excessively high temperature or being placed in cookware that is too small.
- You should make sure that the cooking temperature that is selected is appropriate for the food that you are cooking. You should also ensure that the food is placed in an adequately sized dish and you the drip tray where appropriate.
- THE MARK FREE COATING ON YOUR OVEN HAS BEEN DESIGNED TO LAST THE LIFETIME OF THE OVEN.
- Outer parts of the oven should only be cleaned with warm soapy water, using either a sponge or soft cloth. No abrasive cleaners should be used.
- If you use any form of oven cleaner on your appliance, you must check with Think Appliances of the cleaner that it is suitable for use on your appliance.
- **Any damage that is caused to the appliance by an unauthorised cleaning product will not be fixed by Baumatic free of charge, even if the appliance is within the guarantee period.**

Removable oven roof liner

- Your appliance is supplied with a roof liner, which should be slid over the top of the grill element.
- Once you have finished cooking, the liner should be removed and thoroughly cleaned after each use of the appliance.
- **Do not** allow fat and grease to build up on the oven liner, as this could cause a fire hazard.

Replacing the oven bulb

IMPORTANT: The oven must be disconnected from your mains supply before you attempt to either remove or replace the oven bulb.

- Remove all oven shelves, the drip tray and the side rack that is on the same side as the oven light.
- Remove the light cover by turning it anti-clockwise.
- Unscrew the bulb clockwise and remove it from its holder.
- Replace the bulb with a 25 W/300°C, screw type pigmy.
- **Do not** use any other type of bulb.
- Place the lamp cover back into position.

Removing the oven door for cleaning

To facilitate the cleaning of the inside of the oven and the outer frame of the oven, the door can be removed as follows: -

- The hinges **(A)** have two movable bolts on them **(B)**.
- If you raise both of the movable bolts **(B)**, then the hinges **(A)** are released from the oven housing.
- You should grip the sides of the door at the centre and then incline it slightly towards the oven cavity and then by pulling it gently away from the oven cavity.
- **IMPORTANT:** You should make sure that the door is supported at all times and that you place the door on some padded material whilst cleaning it.
- The oven door and door glass should only be cleaned using a damp cloth and a small amount of detergent. The cloth **MUST NOT** have come into contact with any form of cleaning product or chemical previously.
- To refit the door you should slide the hinges back into their slots and open the door fully.
- **IMPORTANT:** The movable bolts **(B)** must be closed back into their original positions before closing the door.

- **Take care not to dislodge the hinge locking system when removing the door, as the hinge mechanism has a strong spring.**
- **Do not immerse the door in water at any time.**

Removing the inner door glass for cleaning

- Do not use any abrasive cleaner that could cause damage.
- Remember that if the surface of the glass panel becomes scratched, this could lead to a dangerous failure.
- To facilitate cleaning, the door glass can be lifted out after removing the fixing screws and turning the metal stoppers that hold the glass in position.
- When refitting, make sure that the glass is correctly seated in the door recess and the correct way round, before turning the metal stoppers back to their original position and fully tightening the fixing screws.

INSTALLATION

The installation must be carried out by a suitably qualified person, in accordance with the current version of the following.

- UK Regulations and Safety Standards or their European Norm Replacements.
- **Building Regulations** (issued by the Department of the Environment).
- **Building Standards** (issued by the Scottish Development Department).
- **IEE Wiring Regulations.**
- **Electricity At Work Regulations.**

Before connecting the appliance, make sure that the supply voltage marked on the Rating Plate corresponds with your mains supply voltage.

WARNING: THIS APPLIANCE MUST BE EARTHED.

- This appliance should be wired into a 13 A double pole switched fused spur outlet, having 3 mm contact separation and placed in an easily accessible position adjacent to the appliance. The spur outlet must still be accessible even when your oven is located in its housing.

- To connect the oven power cord, loosen and remove the cover on the terminal block, in order to gain access to the contacts inside. Make the connection, securing the cord in place with the cable clamp provided and then immediately close the terminal block cover again.
- If you have to change the oven power cord, the earthing (yellow/green) conductor must always be 10 mm longer than the line conductors.
- Care must be taken to ensure that the temperature of the mains supply cable does not exceed 50°C.
- If the mains supply cable is damaged, then it must be replaced by an appropriate replacement which can be obtained from the Baumatic Spares Department.

Installing the oven into the kitchen cabinet

BAO4636-P

BAO6035-P

Positioning the appliance

- Ensure that the aperture that you will be fitting the oven into is of the size given in the above diagrams (depending on whether you are installing the BAO4636 or the BAO6035).
- The oven must be fitted into an oven housing with the ventilation cut-outs shown in the "Ventilation requirements" section on the next page.
- Ensure that the rear panel of the furniture housing unit has been removed.

Ventilation requirements

(Figure shows the ventilation and cut-out requirements for the installation of the appliance into a standard kitchen unit).

(Figure shows the ventilation and cut-out requirements for the installation of the appliance into a tall housing unit).

- Ensure that the oven has been securely fixed into the housing unit. The fixing of the oven into the housing is made by using four screws. These should be screwed through the oven cabinet and into the housing unit.

My appliance isn't working correctly

- **The oven isn't coming on.**
 - * Check that the oven is in manual operation mode.
 - * Check that you have selected a cooking function and a cooking temperature.
- **There appears to be no power to the oven and grill.**
 - * Check that the appliance has been connected to the electrical mains supply correctly.
 - * Check that the mains fuses are in working order.
 - * Check that the operating instructions for setting the time of day and putting the appliance into manual operation mode have been followed.
- **The grill function works but the main oven does not.**
 - * Check that you have selected the correct cooking function.
- **The grill and top oven element is not working, or cuts out for long periods of time during use.**
 - * Allow the oven to cool for approximately 2 hours. Once cool, check whether the appliance is again working properly.
- **My food is not cooking properly**
 - * Ensure that you are selecting the correct temperature and the correct cooking function for the food that you are cooking. It may be appropriate to adjust your cooking temperature by plus or minus 10°C, to achieve the best cooking results.
- **My food is not cooking evenly**
 - * Check that the oven has been installed correctly and is level.
 - * Check that the correct temperatures and shelf positions are being used.

- **The oven light is not working**
 - * Refer to page 20 and follow the "Replacing the oven bulb" section.
- **I am getting condensation in my oven**
 - * Steam and condensation is a natural by product of cooking any food with high water content, such as frozen food, chicken etc.
 - * You may get condensation in the oven cavity and forming between the oven door glasses. This is not necessarily a sign that the oven is not working correctly.
 - * Do not leave food in the oven to cool after it has been cooked and the oven has been switched off.
 - * Use a covered container, where practical, when cooking to reduce the amount of condensation that forms.

IMPORTANT: If your appliance appears not to be operating correctly, then you should switch off the oven and then contact the Baumatic Service Department.

DO NOT ATTEMPT TO REPAIR THE APPLIANCE YOURSELF.

Please note that if an engineer is asked to attend whilst the product is under guarantee and finds that the problem is not the result of an appliance fault, then you may be liable for the cost of the call out charge.

The appliance must be accessible for the engineer to perform any necessary repair. If your appliance is installed in such a way that an engineer is concerned that damage will be caused to the appliance or your kitchen, then he will not complete a repair.

This includes situations where appliances have been tiled in, sealed in with sealant, have wooden obstructions placed in front of the appliance, like plinths. Or any installation other than the one specified by Baumatic Ltd. has been completed.
