

## Jet Clean Station™ – compatible with all Jet Series Stick Vacuums

Available in Silver & White

### Key Features

The perfect accessory to Samsung Jet Series:

1. Easy to Empty Dustbin
2. 5 layered Dust Filtration system
3. Air pulse technology
4. Locking mechanism

### Key features & message hierarchy

#### Hygienically empties out the dustbin

Get rid of vacuum dust without the hassle. Simply detach the dustbin and insert into the Clean Station™. Once in, the bottom lid of the dustbin opens, to help hygienically empty dust from the bin without scattering back in the air.

#### 5 layered Dust Filtration System

Trap up to 99.999% of dust and allergens<sup>1</sup> with the 5 layered Dust Filtration system. A disposable dust bag initially captures large dust particles, then a Pre-Motor filter traps smaller dust. It also has an Activated Carbon filter for deodorization and a Noise Absorption filter. Finally, an Ultrafine Dust Filter traps 0.3~10µm<sup>2</sup> size dust and allergens.

#### Air Pulse Technology

When the Clean Station™ is on, Air Pulse Technology repeatedly opens and closes the inlet of the suction motor creating air currents that help shake off the dust inside the dustbin<sup>3</sup>. The dust is then gathered in the 2L dust bag inside which needs replacing only every 2-3 months<sup>4</sup>.

#### Locking Structure

The two button locking structure is designed to prevent the dustbin from opening while in use during cleaning. It is also conveniently designed so the dust bin can be inserted on top of the product from any direction.

#### LED Notification

Its easy to keep track of when it's time to change your dust bag. The blue LED light on the front of the Clean Station™ turns from blue to red when it's full and time for a new dust bag. These removable dust bags are also available as an additional accessory to the Clean Station™.

#### DISCLAIMERS:

1 - Tested based on the IEC62885-2, Cl. 5.11 standard. Based on SLG (Schubert Leiter Geratesicherheit) tests.

2 - 0.3~10µm size is the particle size that is generally invisible to human eyes, such as pollen and mold.

3 - Results may vary depending on individual use. Dust and hair stuck inside the grille may not be removed with a single cycle.

4 - Based on internal testing. Results may vary depending on individual use.

Model Details	
VCA-SAE90A	Warm Silver (matches Jet VS90 Series in Silver)
VCA-SAE90B	White (matches Jet VS70 Series in White)
Key Specs	
Set Dimensions (WxHxD)	600 x 185 x 180
