EXPERT MODE

ILVE's induction cooktops are for people who have been thinking about upgrading their cooktop at home but aren't able to go gas, ILVE's induction systems are the ultimate alternative.

Unlike normal electric cooktops, induction technology produces heat by creating a magnetic field which generates heat directly to the cooking vessel. This means that the heat is instantaneous, temperature control is immediate and the heat is evenly spread over the bottom of the pan, meaning no more annoying hot or cold spots, the ILVE induction elements also include booster zones to minimize heat up times even further.

Standard Option - Cooktop Colour

Black Glass

60CM INDUCTION COOKTOP

ILD60B

ILD60B 60CM INDUCTION COOKTOP

FINISH

- KeraBlack+ glass

FEATURES

- Touch control +/- with 10 heating levels (from 0 up to 9)
- Ergonomic central position allows more space for the pots
- 4 timers simultaneously operational with egg-timer
- Fast heat-up time
- Standby consumption < 0,5W

SAFETY

- Child lock
- 4 residual heat indicators
- Protection against incorrect 400V connection
- Auto-Power (heating area and delivered power adapt themselves to the pot being used)
- Auto-Stop (in case of accidental start, long absence, overflow or over-temperature)
- Auto heat reduction
