

Assembly and Operating Instructions

# SIDE BURNER

BS26010, BS26410

AUSTRALIA / NEW ZEALAND

Dear customer,

Congratulations and thank you for choosing our appliance. We are sure you will find it a pleasure to use. Before you use the appliance, we recommend that you read through the relevant sections of this manual, which provide a description of your appliance and its functions.

To avoid the risks that are always present when you use an appliance, it is important that the appliance is installed correctly and that you read the safety instructions carefully to avoid misuse and hazards.

We recommend that you keep this instruction booklet for future reference and pass it on to any future owners.

After unpacking the appliance, please check it is not damaged. If in doubt, do not use the appliance but contact your local customer care centre.

This appliance complies with requirements of Australian Standards AS4563.

CONDITIONS OF USE

- These important notes apply to your appliance, failure to adhere to these conditions of use may affect your ability to make a claim under the manufacture’s warranty.
- This appliance MUST be installed and serviced only by a qualified licensed person.
  - This product is intended for installation and use at a domestic residence only. This product is not intended for commercial use.
  - This product is not suitable for installation or use in marine craft, caravans or recreational vehicles.
  - This product must be installed in accordance with these instructions, the requirements of AS/NZS 5601.1 and in accordance with local authority.
  - This product must be installed, operated and maintained as per the instructions.
  - Ventilation holes in the unit must not be obscured by the installation.

Please ensure you read the instruction manual fully before you call for service, or a full service fee could be applicable.

Please read the user manual carefully and store in a handy place for later reference.

The symbols you will see in this booklet have these meanings:

 **WARNING**  
This symbol indicates information concerning your personal safety.

 **CAUTION**  
This symbol indicates information on how to avoid damaging the appliance.

 **IMPORTANT**  
This symbol indicates tips and information about use of the appliance.

 **ENVIRONMENT**  
This symbol indicates tips and information about economical and ecological use of the appliance.

Please read the user manual carefully and store in a handy place for later reference.

 **IMPORTANT**  
Important – check for any damages or marks

If you find the appliance is damaged or marked, you must report it within 7 days if you wish to claim for damage/ marks under the manufacturer’s warranty. This does not affect your statutory rights.

 **ENVIRONMENT**  
Information on disposal for users

- Most of the packing materials are recyclable. Please dispose of those materials through your local recycling depot or by placing them in appropriate collection containers.
- If you wish to discard this product, please contact your local authorities and ask for the correct method of disposal.

 **WARNING**  
This appliance must be serviced only by a qualified licensed person.

Improper installation, adjustment, alteration or maintenance can cause injury or property damage.

Please contact your nearest Electrolux Service Department for additional information or assistance for an approved installer.

NOTE: This manual must remain with the owner for future reference.

-  **WARNING**
- Do not lean over appliance when lighting.
  - Do not leave the appliance unattended when alight.
  - Do not delay lighting once the gas has been turned on.
  - Do not store or use aerosol cans in the vicinity of the appliance.
  - Do not store flammable liquids in the vicinity of the appliance.
  - Do not use caustic or abrasive based cleaners on the appliance.
  - Do not attempt to dismantle or adjust the control valves.
  - Do not attempt to dismantle or adjust the regulator.
  - Do not test for leaks with a naked flame.
  - Do not modify the construction of this appliance or modify the injector orifice size.
  - Do not obstruct any ventilation of the appliance.
  - Do not allow children to operate or play near the appliance.

 **CAUTION**  
This appliance is supplied set up for Natural Gas and is labelled accordingly. A Universal LPG conversion kit is included if required. Conversion of this unit to Universal LPG must be carried out by a qualified licensed person and a Certificate of Compliance must be issued to the owner at the completion of the installation and conversion.

## Assembly

Attach your side burner to your barbecue trolley as explained in the separate barbecue/trolley instructions.

## Attach The Trivet

Place the trivet on the body of the side burner. The small notches underneath the trivet should sit neatly in the holes in the steel, as shown.

## Temporarily Remove The Drip Plate

In order to properly connect the hoses to the side burner, you may find it easier to remove the drip plate from underneath the side burner.

Simply undo the screw at the front of the side burner as shown, and then ease the rear drip plate tabs from the side burner body.

You now have clear access to the side burner inlets.

## Connection to Barbecue

Ensure all gas controls on the barbecue and side burner are set to OFF.

Take the connector hose that came with the side burner. Connect one end to the inlet of the barbecue. Connect the other end to the left side gas connection point of the side burner.

If your barbecue came with a cabinet trolley/ cart, your connector hose should already be attached to the barbecue inlet (as indicated by the separate cart instructions). In this case, simply pass the free end of the hose through the hose access hole in the side of the cart prior to connecting to the side burner inlet.

## Connection To Gas Supply

Ensure all gas controls on the barbecue and side burner are set to OFF.

Attach the gas supply hose to the right side inlet of the side burner.

If the gas supply hose is not already attached to the gas supply, then attach it now.

If your barbecue came with a cabinet trolley/cart, your gas supply hose may already be attached to a portable gas cylinder located inside the cabinet. In this case, simply pass the free end of the hose through the hose access hole in the side of the cart prior to connecting to the side burner inlet.

Using two spanners, tighten all gas connections. Do not overtighten.

## Replace The Drip Plate

Push the rear drip plate tabs back into the slots at the back of the side burner body, and secure the front of the drip plate with the screw removed earlier.

## Secure All Joints And Leak Test

The gas leak testing procedure should be conducted every time a gas cylinder is refilled and reconnected to the appliance, or after any new gas connection is made. Never use a naked flame to check for gas leaks.

In a small container, mix up a solution of water and detergent or soap. Mix the solution well.

Make sure that the gas supply valve on the gas cylinder or the shut off valve on the supply line is turned on. Make sure that the gas control valves on the appliance are all turned off.

Using a brush or spray bottle apply the solution to the gas line and each joint in the gas line, including the hose and regulator.

Bubbling of the solution will indicate that there is a leak present. Re-tighten or re-seal any joints that are leaking.

If a leak persists contact your distributor for assistance.

Operation of the optional side burner

Lighting

- 1. Check the control knob is in the Off position and ensure the gas line is properly connected.
- 2. Raise the lid and check that the burner and burner cap are in the correct position.
- 3. Press and turn the control knob slowly (3-4 seconds) in a counter - clockwise direction to the High position until a click is heard. When the burner is alight, select your desired heat setting. A low flame or simmer condition is obtained by turning the control knob anti-clockwise to Low.
- 4. If the burner fails to ignite, turn the control knob to Off, wait 5 minutes and repeat the lighting procedure.

After Use

- 1. Turn the control knob to the Off position and turn the gas cylinder valve off when the barbecue is not in use.
- 2. Clean off any food spills and then close the lid.

WARNING

When using the side burner ensure that any handle fitted to a wok, pot or pan is positioned so that it is out of reach of children.

WARNING

Safety with woks and pots and pans

When using a wok, pot or pan on the side burner ensure that any handle is positioned so that it is out of reach of children. Long handles protruding out beyond the side burner can be dangerous. Keep children away from the appliance when it is operating. Never leave an operating barbecue unattended.

Always open lid before lighting. Do no close lid while burner is alight.

Long handles protruding out beyond the side burner can be dangerous.

Stainless steel cleaning and maintenance

Clean the appliance as required or at least twice annually with hot soapy water. Avoid abrasive cleaners or brushes as these will mark the porcelain enamel or stainless steel surfaces of the appliance. If you cook food directly over the burner flame, causing more vapour or smoke, the viewing glass (where fitted) will need more frequent cleaning.

Stainless steel care and cleaning

After the appliance has been used, wash down the surfaces with hot soapy water. The surface of the stainless steel has a grain. Always clean along the grain of the steel. This will avoid unwanted marks. Near the ocean or salt-water environment, wash regularly, rinse and then dry before covering. Covering a salt sprayed stainless steel product while still wet will allow salt deposits to form, causing rust to form even on very high grade stainless.

Discoloration of stainless steel

The discoloration of stainless steel, caused by high heat is caused by Chromium Oxide and sometimes appears as a light brown colouring over the surface of the steel. In most cases, this discoloration can be removed with a suitable stainless steel polish.

NOTE: Discoloration of the stainless steel is not covered under warranty.

Porcelain enamel cleaning and maintenance

After the appliance has been used, wash down the surfaces with hot soapy water. Near the ocean or salt-water environment, wash regularly, rinse and then dry before covering. Highly caustic cleaners should be avoided.

CONDITION	CLEANING PRODUCT	METHOD
Readily removed stains	Soap, liquid detergents, or powder detergents with warm water. Methylated spirits may be used before final wash with detergent.	Avoid scratching. Do not use cleaners containing bleaching agents. Rinse with clean water to remove residual cleaning compounds and dry before covering. Only use mild detergents on barbecue fascia.
Light grease		
Routine cleaning		
Salt spray		
Non washable deposits	Concentrated detergent. Domestic cleaning powders. Recommended stainless steel cleaners.	Do not use steel wool. Rub in straight lines along the polish pattern. Avoid scratching. scratching. Rinse with clean water and dry.
Heavy grease		

IMPORTANT

Care should be taken with all cleaning agents to avoid damage to any associated non-stainless steel components. Fire, safety and protective clothing regulations should be closely adhered to.

Rust

Cast iron and steel are metals and will rust if you do not provide sufficient maintenance and care. Rust occurs when the surface of the metal starts to oxidise. Generally, rust will occur on any exposed metal surface if it is not protected from the elements. Even stainless steel can be affected by long term exposure to the elements. To prevent exposure to the elements, store your barbecue, hood and trolley under the protection of a purpose made cover.

Do

- Wash regularly with warm soapy water or detergent using a clean cloth and, if necessary, a soft bristle brush.
- Remove non-washable deposits using an approved cleaner.
- In the case of stainless steel, clean in one direction only, along the original polish lines.
- Rinse well with clean water and wipe dry.
- Keep barbecue covered when not in use. eg polyester barbecue cover.

Don't

- Use steel wool or metallic scrapers to remove non-washable deposits.
- Allow grease or dirt to accumulate or to dry out and harden.
- Use cleaners containing harsh abrasives or high bleach content.

Service and maintenance

This appliance should be checked and serviced by an authorised service person every 2 years to ensure the appliance remains in a safe operation condition. These services are not covered by warranty.

SERVICE AND MAINTENANCE	FREQUENCY		BY AUTHORISED
	EACH USE	EVERY SIX MONTHS	EVERY SIX MONTHS
Check gas supply hose(s) for cracks and leaks	✓		
Check gas regulator for leaks	✓		
Check that all gas fittings are tight	✓		
Clean and inspect burner		✓	
Clean and inspect gas injector			✓
Check the gas control valve on the cylinder			✓
Inspect ignition system			✓
Inspect gas control valve			✓

Most importantly, this is an outdoor appliance. Ensure it is positioned safely away from anything that can catch fire.

**Indoor Use Only:** Under no circumstances is this side burner to be used indoors. This includes garages or any other enclosed area.

**Clearance From Combustibles:** Ensure the side burner remains at a distance of at least 45cm (18”) from any combustible material such as wood, gyprock, paper and plants. Do not store combustible materials, gasoline or flammable liquids or vapours within 45cm (18”) of the appliance.

**Adequate Ventilation:** Ensure there is adequate ventilation for the appliance and cylinder. This is required not only for proper combustion, but also to prevent gas build up.

**Firm Level Surface:** Use your barbecue only on a firm level surface. This appliance is not designed for recreational vehicles, and shall not be installed on a boat or any marine craft.

**Protection From Weather:** Keep the side burner protected from adverse weather, including rain and high winds. Polyvinyl covers are available that have been specially designed for this range of barbecues.

Allow clear access to the entire gas supply hose and regulator.

**Maintenance Access:** When your side burner is installed, you should be able to access the gas supply line including the gas piping or hose, gas regulator, gas cylinder and any shut off valves.

**Partial Enclosures:** Many backyards have areas that are partially closed off, such as balconies and pergolas. In some cases, it is hard to decide whether these partially enclosed areas should be classified as indoor areas, particularly in terms of permanent (non-closable) ventilation. The gas safety authorities have agreed on the definition of partial enclosures below.

Partial Enclosures (Australia Only)

This appliance shall only be used in an above ground, open air situation with natural ventilation, without stagnant areas, where gas leakage and products of combustion are rapidly dispersed by wind and natural convection. Any enclosure in which the appliance is used shall comply with one of the following:

Within a partial enclosure that includes an overhead cover and no more than two walls.

Within a partial enclosure that includes an overhead cover and more than two walls, the following shall apply:

- At least 25% of the total wall area is completely open; and
- at least 30% of the remaining wall area is open and unrestricted.

In the case of balconies, at least 20% of the total of the side, back and front wall areas shall be and remain open and unrestricted.

Any enclosure with walls on all sides, but at least one permanent opening at ground level, and no overhead cover.

OUTDOOR INSTALLATION INSTRUCTIONS

WARNING

Contact your local municipality for any building codes regulating the installation of outdoor barbecue appliances. Outdoor installations must conform to local codes or, in the absence of local codes, with the following.

We recommend that this installation be done in a masonry structure and carried out by a professional tradesperson. Other non-combustible material such as Hardiplank, Villaboard with metal studs may also be used.

This appliance must not be installed under or on any combustible material. Minimum clearance from combustible construction materials to all sides of the appliance is 450mm. Australian Standards Code AS: 5601

WARNING

When using an LPG/Propane supply system in an enclosure, ventilation must be provided. Gas vapour is highly explosive and can cause serious bodily injury or damage to property if allowed to accumulate in a confined space and ignited.

Typical installation drawing

Installing the Inbuilt Side Burner

This appliance can only be installed in an enclosure constructed of non combustible material.

- Determine the position of the cutout for the side burner using the diagram shown on this page.
- Ensure that no gas, electricity or any other services run near the position of the cutout.
- Depending on the depth of the bench into which the side burner is being installed, it may be necessary to connect the gas hoses to the side burner first.
- Secure the side burner by drilling through the mounting plate.

FOR SALES IN AUSTRALIA AND NEW ZEALAND  
APPLIANCE: BEEFEATER SIGNATURE BBQ

This document sets out the terms and conditions of the product warranties for BeefEater Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should there be a manufacturing defect in your Appliance. This warranty is in addition to other rights you may have under the Australian Consumer Law.

- In this warranty:**
  - 'ACL' or 'Australian Consumer Law' means Schedule 2 to the Competition and Consumer Act 2010;
  - 'Appliance' means any Electrolux product purchased by you and accompanied by this document;
  - 'ASC' means Electrolux's authorised serviced centres;
  - 'BeefEater' is the brand controlled by Electrolux Home Products Pty Ltd of 163 O'Riordan Street, Mascot NSW 2020, ABN 51 004 762 341 in respect of Appliances purchased in Australia and Electrolux (NZ) Limited (collectively "Electrolux") of 3-5 Niall Burgess Road, Mount Wellington, in respect of Appliances purchased in New Zealand;
  - 'Warranty Period' means the period specified in clause 3 of this warranty;
  - 'you' means the purchaser of the Appliance not having purchased the Appliance for re-sale, and 'your' has a corresponding meaning.
- Application:** This warranty only applies to new Appliances, purchased and used in Australia or New Zealand and is in addition to (and does not exclude, restrict, or modify in any way) other rights and remedies under a law to which the Appliances or services relate, including any non-excludable statutory guarantees in Australia and New Zealand.
- Warranty Period:** Subject to these terms and conditions, this warranty continues for in Australia for a period of 24 months and in New Zealand for a period of 24 months, following the date of original purchase of the Appliance. Specific components are warranted against manufacturing defects in Australia and New Zealand for the periods listed below;
  - Stainless Steel Box – Further 23 years parts only
  - Enamel burner box – Further 8 years parts only
  - Stainless steel plates, grills and burners – Further 3 years parts only
  - Cast iron plates, grills and burners – Further 1 year parts only
- Repair or replace warranty:** During the Warranty Period, Electrolux or its ASC will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Electrolux may, in its absolute discretion, choose whether the remedy offered for a valid warranty claim is repair or replacement. Electrolux or its ASC may use refurbished parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Electrolux.
- Travel and transportation costs:** Subject to clause 7, Electrolux will bear the reasonable cost of transportation, travel and delivery of the Appliance to and from Electrolux or its ASC. Travel and transportation will be arranged by Electrolux as part of any valid warranty claim.
- Proof of purchase** is required before you can make a claim under this warranty.
- Exclusions:** You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. This warranty does not cover:
  - light globes, batteries, filters or similar perishable parts;

- parts and Appliances not supplied by Electrolux;
- cosmetic damage which does not affect the operation of the Appliance;
- damage to the Appliance caused by:
  - (i) negligence or accident;
  - (ii) misuse or abuse, including failure to properly maintain or service;
  - (iii) improper, negligent or faulty servicing or repair works done by anyone other than an Electrolux authorised repairer or ASC;
  - (iv) normal wear and tear;
  - (v) power surges, electrical storm damage or incorrect power supply;
  - (vi) incomplete or improper installation;
  - (vii) incorrect, improper or inappropriate operation;
  - (viii) insect or vermin infestation;
  - (ix) failure to comply with any additional instructions supplied with the Appliance;

In addition, Electrolux is not liable under this warranty if:

- the Appliance has been, or Electrolux reasonably believes that the Appliance has been, used for purposes other than those for which the Appliance was intended, including where the Appliance has been used for any non-domestic purpose;
- the Appliance is modified without authority from Electrolux in writing;
- the Appliance's serial number or warranty seal has been removed or defaced.

**8. How to claim under this warranty:** To enquire about claiming under this warranty, please follow these steps:

- carefully check the operating instructions, user manual and the terms of this warranty;
- have the model and serial number of the Appliance available;
- have the proof of purchase (e.g. an invoice) available;
- telephone the numbers shown below.

**9. Australia:** For Appliances and services provided by Electrolux in Australia: Electrolux goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced if the Appliance fails to be of acceptable quality and the failure does not amount to a major failure. 'Acceptable quality' and 'major failure' have the same meaning as referred to in the ACL.

**10. New Zealand:** For Appliances and services provided by Electrolux in New Zealand, the Appliances come with a guarantee by Electrolux pursuant to the provisions of the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act. Where the Appliance was purchased in New Zealand for commercial purposes the Consumer Guarantee Act does not apply.

**11. Confidentiality:** You accept that if you make a warranty claim, Electrolux and its agents including ASC may exchange information in relation to you to enable Electrolux to meet its obligations under this warranty.
