Love your own favourite coffee speciality

Multi beverage, Multi user

With the Xelsis each and every family member can enjoy his or her favourite coffee speciality. Thanks to the unique multi-user function up to 6 personal user profiles can be created and for each profile up to 9 beverages can be personalised.

Multi-user and Multi-beverage

- Fingerprint user recognition
- 6 unique user profiles for 9 beverages
- Integrated automatic milk function

Bean- to-cup customisation

- SBS: patented adjustable espresso crema and body structure
- Patented intelligent adjustable milk froth
- Full bean-to-cup customisation

Easy to use

- Dynamic multi-media user interface
- Ergonomic in day to day operation

Easy to clean and maintain

- Automatic cleaning and de-scaling
- Frontal access to removable brewing group

PHILIPS

Saeco

sense and simplicity

Highlights

Digital ID

You can immediately and easily select your own personal profile via the fingerprint recognition device.

SBS (Saeco Brewing System)

Philips Saeco exclusively allows you to adjust your espresso's intensity, altering the crema and body structure as it is dispensed. Simply by turning the knob you can prepare the crema exactly according to your taste. A little knob that makes a big difference.

6 users x 9 beverages

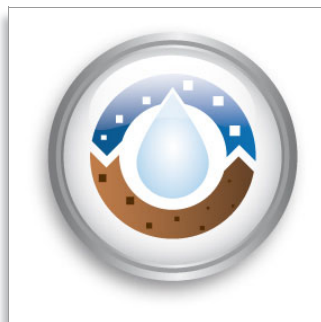

Up to 9 coffee specialities can be personalised by 6 different users — every family member gets his or her own favourite customised speciality with just one touch

Adjustable milk froth

Only Philips Saeco offers an intelligent milk froth adjustment system. Simply select the level of froth you'd like via the beverage menu.

Auto cleaning and de-scaling

Easy to use and easy maintenance: Thanks to the automatic cleaning and de-scaling cycles, you are guaranteed perfect enjoyment every day and maximum longevity for your machine.

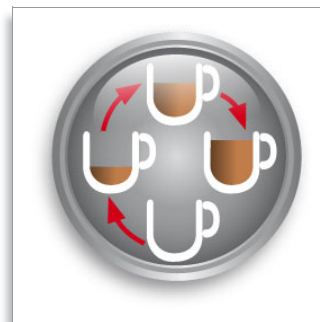

Integrated automatic milk function

With the integrated milk carafe, all you have to do is fill it with milk and simply selecting your favourite milk speciality. With the integrated milk function the milk can be served hot or frothed. By simply pressing your favourite beverage—whether it is a latte machiato, a

cappuccino or caffelatte—your drink will be served within seconds as creamy froth or hot milk will be poured automatically into your beverage. The advanced milk management includes two automatic steam-rinsing cycles. And for thorough cleaning the whole device is easily dismantled.

Multi-media user interface

The wide colour TFT screen allows colourful and dynamic pictures to always know exactly what the machine is doing or what it needs

Removable brewing group

The brewing group is at the heart of every fully automatic coffee machine and it should always be kept clean. A task that doesn't get any more convenient than with a Saeco: remove, rinse and re-insert — finished.
