## Specifications

It is a requirement of State Plumbing Codes that licensed plumbers carry out all sanitaryware installations. All installations should comply with the relevant requirements of AS/NZS 3500 and local plumbing codes.

### Pressure:

[1] Maximum Hydrostatic Pressure: 1000kpa. This pressure may be exceeded only under test conditions as per AS/NZS 3500. Where hydrostatic pressure exceeds the maximum stated above, pressure-limiting valves should be installed. [2] Recommended Maximum Hydrostatic Pressure: 500kpa (AS/NZS 3500)

[3] Recommended Minimum Hydrostatic Pressure: 150kpa.

### Temperature:

Maximum Water Temperature: 80° C. For optimum performance, hot and cold inlet water pressure should be equal.

## Care and Maintenance

[1] Product should be inspected for surface damage prior to installation. [2] Cleaning and handling of all finishes must be performed carefully. [3] Clean products using a soft cloth with warm soapy water only. [4] Never use harsh detergents or abrasive cleaners as these will damage the product. [5] Water marks can be removed from Matt Finishes with an application of a carnauba wax based non-abrasive polish on a microfibre cloth. [6] Do not use undue pressure when cleaning and wipe in one direction only. [7] Contact with harsh chemicals such as hair dye, hair bleach etc will result in damage to the finish. [8] Tapware should never be installed using acetone silicones. [9] Avoid the use of wax based furniture creams as this can result in a build up of deposits which will detract from the appearance. [10] Damage to finishes arising from improper installation or post installation use or failure to observe the above care and cleaning instructions will void all warranty agreements.
