The Range: 60cm Single Ovens

BOSE6APX/BOSE69PX

60cm Multi-function oven

Colour:

Model BOSE6APX: Stainless Steel

Model BOSE69PX: Stainless Steel

Method of installation: Wall mounted or Underbench

Dimensions: 592H x 592W x 567Dmm

Flush mount

Cutout size: 594H x 594W x 567Dmm

BOSE6APX

Top element: 2100W

Fan element: 2000W

Lower element: 1200W

Power requirement: 3.385 kW

BOSE69PX

Top element: 2100W

Fan element: 2000W

Lower element: 1200W

Power requirement: 3.385 kW

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

**If the housing unit is open at the back, the gap must not be more than 70mm.*

The Range: 60cm Single Ovens

BOSE68X/BOSE67

60cm Multi-function oven

Colour:

Model BOSE68X: Stainless Steel

Model BOSE67X: Stainless Steel

Model BOSE67W: White

Method of installation: Wall mounted or Underbench

Dimensions: 592H x 592W x 567Dmm

Flush mount

Cutout size: 594H x 594W x 567Dmm

BOSE68X

Top element: 800/1800W

Fan element: 2000W

Lower element: 1200W

Power requirement: 3.375 kW

BOSE67X/W

Top element: 800/1800W

Fan element: 2000W

Lower element: 1200W

Power requirement: 2.635 kW

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

**If the housing unit is open at the back, the gap must not be more than 70mm.*

The Range: 60cm Single Ovens

BOSE63, BOSE65 60cm Multi-function oven

Colour:

Model B0SE63W	White
Model B0SE63X	Stainless Steel
Model B0SE65W	White
Model B0SE65X	Stainless Steel
Model B0SE65B	Black

Method of installation: Wall mounted or Underbench

Dimensions: 594H x 598W x 522Dmm

Flush mount

Cutout size: 598H x 602W x 560Dmm

Power requirement: 2.16 kW 10Amp 3 pin plug supplied

BOSE63 elements:

Grill element:	1800W
Upper element:	800W
Lower element:	1000W
Circular heating element:	2100W (fan)
Maximum power:	2175W

Upper element:	800W
Lower element:	1000W
Maximum power:	1900W

Ventilation: Front door venting

N.B. BSO60 & BSO62 are from the Blanco Classic range.

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

The Range: 75cm Single Oven

BOSE752X

75cm Multi-function oven

Colour:

Model BOSE752X: Stainless Steel

Method of installation:

Wall mounted or Underbench

Dimensions:

598H x 748W x 565Dmm

Flush mount

Cutout size:

602H x 752W x 560Dmm

Power requirement:

2.9 kW 15Amp power cord fitted

Oven element:

2600W (Fan)

Upper & Lower element:

2600W

Upper element:

1100W

Lower element:

1500W

Grill element:

2400W

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

The Range: 90cm Single Oven

BOSE902X

90cm Multi-function oven

Colour:

Model BOSE902X: Stainless Steel

Method of installation:

Wall mounted or Underbench

Dimensions:

475H x 895W x 561Dmm

Flush mount

Cutout size:

479H x 899W x 561Dmm

Power requirement:

2.9 kW 15Amp Power cord fitted

Oven element:

2600W (Fan)

Grill element: 1650W

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

The Range: 45cm Single Oven

BOSE45X

45cm Single Electric oven

Colour:

Model BOSE45X: Stainless Steel

Method of installation:

Wall mounted or Underbench

Dimensions:

596H x 450W x 547Dmm

Flush mount

Cutout size: 600H x 454W x 560Dmm

Power requirement:

1.6 kW 10Amp 3 pin plug supplied

Upper & Lower element:

Upper element: 1400W

Lower element: 800W

Grill element: 1400W

*A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

Oven Installation

Oven Installation

When installing an oven in either Underbench or Column cabinetry, provision must be made for effective cooling air circulation. Adequate supply of air flow will reduce the risk of the oven overheating.

A minimum 2mm gap on sides, top and bottom of oven is recommended in order to improve circulation around the oven.

Underbench Installation

An opening cutout below the oven is required to ensure effective oven cooling. Fig. 1. Dimensions of this opening are clearly noted in each individual oven specification.

It is critical that the cabinet construction does not obstruct the air flow from the bottom to top via the oven cavity. Fig. 2. This allows the natural convection that occurs, to cool the oven and cabinet cavity.

The entrance opening in the bottom part of the cabinet must measure at least 200cm².

Column Installation

The rear opening from entrance to exit should measure at least 200cm² to ensure proper air flow resulting in effective oven and cabinetry cooling. Fig. 3.

Fig. 1.

Refer to individual oven specifications for dimensions of the cutout recommended, with the space underneath remaining void for effective heat disbursement.

Fig. 2.

Fig. 3.

The Range: Steam Oven

BOSS38X

Steam oven

Colour:

Model BOSS38X: Stainless Steel

Method of installation: Wall mounted or Underbench

Dimensions: 390H x 595W x 470Dmm

Proud mount

Cutout size: 380H x 562W x 450Dmm

Steam element: 1600W

Power requirement: 1770W

*Note: Cut-out information is for proud mount installation. For all types of installation, it is important to allow 2mm to cater for correct steam oven door opening clearance.

The Range: Microwave Ovens & Trim Kit

BMO300X

30 Litre Microwave Oven

Colour:

Model BMO300X: Stainless Steel exterior and cavity

Method of installation: Freestanding or built in with trim kit

External dimensions: 305H x 525W x 461Dmm

Oven cavity dimensions: 219H x 350W x 384Dmm

Turntable: 314mm

Clock: 12 hour (digital)

Timer: 99 minutes, 99 seconds

Power levels: 9

Auto cook: 4 menu options

Safety: Child lock system

Power consumption: 240V - 50hz

Rated microwave power output: 1000W

Operation frequency: 2450MHz

Net weight: 17.9kg

Connected 3 pin power cord: 1.4m

BMO280X

28 Litre Microwave Oven with Grill Function

Colour:

Model BMO280X: Stainless Steel exterior and cavity

Method of installation: Freestanding or built in with trim kit

External dimensions: 305H x 525W x 445Dmm

Oven cavity dimensions: 219H x 350W x 355Dmm

Turntable: 314mm

Clock: 12 hour (digital)

Timer: 60 minutes

Power levels: 5

Auto cook: 9 menu options

Safety: Child lock system

Power consumption: 230-240V - 50hz

Rated microwave power output: 900W

Operation frequency: 2450MHz

Net weight: 19kg

Connected 3 pin power cord: 1.4m

The Range: Microwave Ovens & Trim Kit

BMOC300X

30 Litre Combination Microwave Oven

Colour:

Model BMOC300X: Stainless Steel exterior and cavity

Method of installation: Freestanding or built in with trim kit

External dimensions: 305H x 525W x 478Dmm

Oven cavity dimensions: 219H x 350W x 384Dmm

Turntable: 314mm

Clock: 12 hour (digital)

Timer: 99 minutes, 99 seconds

Power levels: 9

Auto cook: 7 menu options

Safety: Child lock system

Power consumption: 240V - 50hz

Rated microwave power output: 900W Microwave
1400W Convection
1200W Grill

Operation frequency: 2450MHz

Net weight: 22kg

Connected 3 pin power cord: 1.4m

The Range: Country Freestanding Cookers

BFS95FB/BFS95FCR/BFS95FG/BFS95FR

90cm cooktop and electric multi-function oven with triple glazed doors
5 x burners including centre fish burner

Colour:

Model BFS95FB:	Black
Model BFS95FCR:	Creme
Model BFS95FG:	Green
Model BFS95FR:	Burgundy

Method of installation: Freestanding

Dimensions: 900H x 900W x 612Dmm (Height includes non adjustable rubber feet)

Cupboard opening: 905mm

Bench height: 900mm

Power requirement: 2.7 kW

Suitable gases: Natural Gas / Propane

Power cord: 240V 15 Amp Plug

	NG	Propane
Centre (Fish):	11.0 Mj	10.8 Mj
Front Left (Wok):	15.0 Mj	12.9 Mj
Rear Right (Semi Rapid):	6.6 Mj	6.3 Mj
Rear Left (Semi Rapid):	6.6 Mj	6.3 Mj
Front Right (Aux):	3.8 Mj	3.8 Mj

Gas connection: 1/2" BSP Male

Gas connection position: Rear of cooker

Note: Suitable for rigid pipe or flexible hose installation.

Oven comes with a 15 Amp plug that plugs into a 15 Amp socket. This is then hard wired to a 20 Amp circuit board.

The Range: 120cm Freestanding Cooker

BFS120X

120cm cooktop and electric multi-function double oven with triple glazed doors
6 x burners including centre fish/bbq and wok burners

Colour:

Model BFS120X: Stainless Steel

Method of installation:

Freestanding

Dimensions:

900H x 1200W x 612Dmm

Cupboard opening:

1205mm

Bench height:

900mm

Power requirement:

4.35 kW

Suitable gases:

Natural Gas / Propane

	NG	Propane

The Range: Ceramic Glass Cooktops

BCCK32NX

30cm electric cooktop

Squareline

Colour:

Model BCCK32NX: Ceran surface with Stainless Steel Trim

Dimensions:

48H x 290W x 510Dmm

Cutout size:

270W x 490Dmm
Must leave 25mm minimum clearance from bottom of cooktop to dividing shelf

Elements:

2 heating zones

Radiant element ratings:

Front: 1200W
Rear: 1800W

Power requirement:

3.0 kW

Controls:

Graduated 1-6

Built-in height:

Please check nominal depth of cooktop prior to installation.
Allow 50mm between cooktop bottom and kitchen furniture.

BCCK6X/N, BCCK60X/N

60cm ceramic glass cooktop

Squareline

Colour:

Model BCCK6X/N: Ceran surface available with or without frame

Model BCCK60X/N*: Ceran surface available with or without frame

Dimensions:

48H x 580W x 510Dmm

Cutout size:

560W x 490Dmm
Must leave 25mm minimum clearance from bottom of cooktop to dividing shelf

Elements:

BCCK6 3 single, 1 dual heating zone
BCCK60 4 single heating zones

Radiant element ratings:

	BCCK6X/N	BCCK60X/N
Front Left:	700/2100W	1700W
Front Right:	1200W	1200W
Rear Left:	1200W	1200W
Rear Right:	1800W	1700W

Power requirement:

6.3 kW 5.8 kW

Controls:

Graduated heat settings

The Range: Squareline Gas Cooktops

BCG640N/BCG641W

60cm gas cooktop
Squareline
4 x burners (BCG640N)
4 x burners including wok burner (BCG641W)

Colour:

Model BCG640NW: White enamel cooktop with White knobs

Min height above cooktop
Gas/Electric: 600mm

Rangehoods Installation

Recirculated to kitchen area via bulkhead

Recirculated to kitchen area via ceiling cavity

Ducted to atmosphere through wall

Ducted to atmosphere through roof

Rangehood Installation

Exercise care when a rangehood is installed in an area where a gas burner is operating. Depending on the size of the room, the rangehood may draw from the room air that is necessary for proper combustion of the burner.

All Blanco rangehoods are used for indoor application only.

Rangehoods may be ducted in two ways:

1. Ducted to the atmosphere (outside).
2. Recirculating.

We recommend ducting to the atmosphere to ensure optimum performance. Recirculating the air back into the room should only be used when outside extraction is not possible.

To ensure maximum performance when ducting it is important the ducting that carries the fumes away, be as short and as straight as possible.

Overhead Clearances

Any combustible construction, rangehood or exhaust fan shall be installed in accordance with the manufacturers instructions. However, in no case shall the clearance between the highest part of the HOB of the cooking appliance (including trivets for gas cookers) and a rangehood be less than 600mm or, for an overhead exhaust fan, 750mm.

When incorporating a rangehood in the design of a kitchen the following points need to be considered to achieve the most benefit from the rangehood.

1. Ducting from a rangehood carrying the exhaust air, should not exceed a length of three (3) metres.
2. For ducted installation we recommend using galvanised or similar metal type flue pipe. **PVC pipe is not recommended.**
3. Ducting containing a 90° degree bend will encounter a loss in efficiency of approximately 35%. Additional 90° degree bends can cause losses of up to 15% per bend.
4. Ducting size should always comply with the manufacturers specification.
5. We recommend carbon filters be used when recirculating the air into the room. There will be some loss of air movement when carbon filters are fitted.

BLKDW

Bowl levelling kit including two designer wastes

The BLANCO bowl levelling kit is specifically designed to simplify installation of any sink with differing bowl depths.

Australian Standards Approved. Certificate number 8711.

PWL23

Spazio Sink Space Saving Kit

BLANCO Spazio Kit

The BLANCO Spazio Kit has been designed and manufactured specifically for use in Australia and carries the Australian Standards watermark. It consists of 10 major components and several secondary fittings for connection to dishwashers' etc. This kit allows the installer to connect sinks with three outlets of varying heights and centres by cutting any or all the pipes supplied to suit the size of the cabinetry.

Tip: Try assembling the entire unit before installation. This will help the installer to understand how the kit goes together before they start cutting the connectors.

For installations that require waste disposer connection, the installer can simply cut the necessary components to ensure that the pipe work is kept to the back of the cupboard. All fittings required are included in the system for connection to a waste disposer or dishwasher.

The Spazio Kit can be adapted to suit any installation requirements. All Spazio Kits include both "S" & "P" trap connections. The "P" trap has been featured in the graphics on the left.

A licensed plumber should carry out all installations of this kit!

The plumber will be required to supply a 50mm F & I connector to terminate the 50mm PVC pipe coming into the cabinet. This will allow easy connection to the PWL23 kit.

Australian Standards Approved.

Licence No. W053.

Because Life's Meant To Be Easy

BLANCO is proudly distributed in Australia by Major Electrical Appliances (MEA). MEA continues to make a concerted effort to produce the most 'up-to-date' and comprehensive literature, however this brochure must not be regarded as an infallible guide to the current specifications, as products are constantly changing to ensure the market has access to the best of European excellence.

Please consider the environment by helping us recycle. If you no longer need this brochure, please either return it to the store or dispose of it in a paper recycling bin.
