- ✓ 17.5kg Total Wash Load¹
- ✓ Inverter Direct Drive Motor System
- ✓ 1000rpm Max Spin on Main Washer²
- ✓ Add Item
- ✓ Smart ThinQ™ (Wi-Fi)²

TWINWash™ System

The LG TWINWash™ system combines a large capacity washer dryer combo unit for large everyday loads with a 2.5kg pedestal top load cold water washer for speciality loads that are a big deal such as special care clothing or delicates. The total system enables simultaneous washing to save on overall wash times and the versatility to use the appliance best suited to individual washing needs.

TrueSteam®²

TrueSteam® on the LG TWINWash™ Main Washer has the natural ability to fluff up fabric fibres. This allows for the steam particles to clean on a microscopic level. Instead of saturating the stain with just one drop of water, we get 1,600 individual steam particles attacking the stain. By combining both water and steam along with washing at a higher temperature your detergent is dissolved much faster.

TurboClean™²

TurboClean™ on the LG TWINWash™ Main Washer uses a short burst of water spray from nozzles located at the front of the drum during the rinse cycle to help deliver quicker wash times. By reducing the number of rinse cycles overall washing time can be reduced.³

6 Motion Wash Technology²

The LG TWINWash™ Main Washer uses a combination of 6 motions, based on hand-washing, to wash your clothes. Simply choose a cycle and your machine selects the best combination of washing motions to give you an outstanding wash, whilst also caring for your clothes. The TWINWash™ Mini features 3 Motions, which are suited to the speciality loads designed for this washer.

¹ 15kg Main Washer for normal loads plus 2.5kg Mini Washer for specialty loads

² Available on Main Washer

³ TurboClean available on selected wash programs. Time and water saving will vary depending on model, wash load and cycle selected.
