## Freestanding Cooker, 90cm, Induction

This Fisher & Paykel 90cm freestanding induction cooker allows you to use a variety of cooking styles with eight oven functions.

**Stainless Steel**

### Dimensions

Depth	600mm
Height	<b>A</b> 897mm
Width	<b>B</b> 897mm

### Features & Benefits

#### Cooking flexibility

This freestanding induction cooker has eight functions with pre-set temperatures, including Bake, Grill and Fan Forced allowing you to use a variety of cooking styles.

#### Sized to suit

Designed for multi-shelf cooking, this freestanding induction cooker provides 100L of total capacity giving you enough room for a large family roast and all the trimmings.

#### Precise control

The induction cooktop offers extremely accurate, consistent temperature control from very high to very low heats, so you can sear, sauté and temper like a pro.

#### Easy cleaning

Catalytic liners break down oil and fat splashes during cooking so you don't have to spend hours cleaning. The durable ceramic cooktop just needs a quick wipe after use to maintain its good looks.

#### Safe and sound

The door and cavity cooling system keeps the heat on the inside, protecting your hands and surrounding cabinetry. Getting large dishes in and out of the oven is a breeze with non-tip shelves.

#### Designed to match

With their black reflective glass and stainless steel finish, our freestanding cookers are designed to match the rest of Fisher & Paykel's kitchen appliance family.

#### Bake

The Bake function radiates heat from the top and bottom of the oven whilst natural convection currents evenly distribute heat. Moisture is retained to provide light, succulent dishes. For best results, only bake on one shelf at a time.

#### Fan Bake

Fan Bake generates heat at the top and bottom of the oven, with the fan creating airflow throughout. The increased airflow speeds up cooking so oven temperatures can be lowered by 20oC for most recipes. Ideal for baking biscuits, muffins and cakes.

#### Fan Forced

The Fan Forced function is great for multi-shelf cooking. Heat is generated at the rear of the oven and is distributed evenly throughout by the fan.

#### Fan Grill

The intense heat and radiation of the Fan Grill function works well for cooking large cuts of meats, so they are moist inside and crisp on the outside.

Grill

The Grill function delivers intense heat from the inner region of the top element when you need to quickly grill one or two portions. Perfect for cooking crispy chicken breast, steak and fish. The intensity can be finely controlled; ‘HI’ is ideal for quick surface browning.

Warm

Warm is limited to very gentle temperatures. It isn’t intended as a cooking function but is designed to keep food warm and limit the progression of cooking. Using the oven’s specialised LO Warm setting takes the guesswork out of proving dough.

Rotisserie

Heat energy is generated from the grill element and the fan circulates the hot air throughout the cavity. The rotational motion helps to ensure that the food is constantly coated in moisture (self-basting), keeping the food moist and tender.

Specifications

Accessories

Flat Shelf	•
Grill pan and grill rack	1
Grill rack	1
