Features & Benefits

What is SmartDrive™?
By combining smart electronics and a direct drive motor that connects directly to the wash drum, the need for a belt and pulleys is removed and the motor constantly provides feedback to a computer controlling the tumble and spin action.

Forgotten Something?
Missed an item from your wash? Our Add a Garment function allows you to pause your wash cycle, open the door and add or remove items. Then carry on washing.

Wool and Sports Cycles
The special Woolmark-approved wool cycle cleans gently and beautifully. The sports cycle starts washing with cold water then gently heats up as it washes. This stops mud and stains from setting into the fabric.

Timed Liquid Detergent Dispenser
Designed for use with the pre-wash program, a dedicated liquid detergent dispenser ensures liquid detergents are distributed into the wash at exactly the right time in the cycle to optimise wash performance.

Soak
The soak option, which is not available in many front loaders, includes a one-hour soak and tumble sequence to help lift unwanted stains.

Interior Light
It's dark inside front loaders and the low energy LED interior light makes finding that last sock a lot easier.

Quick Vortex Wash Cycles
Fisher & Paykel have developed the Vortex Wash which speeds up the cleaning process so most cycles take less than an hour to complete. This is like an explosion in the midst of the tumble action which thrusts the sudsy water from the bottom of the drum into and through the clothes. By getting the cleaning agents and heat into the fibres of the clothes quicker the clothes get clean quicker.

Time Saver Wash Cycles
The Time Saver Option activates a special temperature profile and unique tumble sequence to speed things up even more when you are in a rush.

Specifications

Consumption	
Annual Energy Consumption	329 kWh/year
Energy Star rating	4
Water Consumption l/cycle	61 L
Water rating	5
