Width	599

Features & Benefits

What is DishDrawer™ Technology?

The DishDrawer™ dishwasher's internal microprocessor controls how the wash mechanism operates based on the load and wash cycle. The spray arm rotates at different speeds depending on the wash cycle selected to deliver better dish care.

Ergonomic

DishDrawer™ dishwashers are as easy to open and close as kitchen drawers and can be conveniently positioned at bench height so loading and unloading requires minimal bending.

True Half Load

Each drawer holds a true half load for guilt-free small washes and fast turnaround of your dishes. Both drawers operate independently so different wash cycles can operate simultaneously to accommodate a variety of loads.

Reliable Performance

The combination of intelligent technology and simple mechanics means more space for your dishes, greater reliability and excellent wash performance.

Easy to Load

The DishDrawer™ dishwasher includes a range of flexible racking options. The cutlery basket can be customised for different utensils. Folding tines can be folded flat to accommodate a full load of pots.
