NeoFrost™ Dual Cooling

Stay green and eat fresh.

Beko NeoFrost™ refrigerators feature two separate cooling systems, helping keep humidity at an optimum level, preventing odour transfer between the fridge and the freezer, maintaining the maximum level of air quality. NeoFrost™ technology provides the best cooling conditions to help keep your favourite foods as fresh as you love them.

Active Odour Filter

Filters the circulated cool air inside the refrigerator eliminating unwanted odours and bacteria to help keep the food fresh inside.

Active Fresh Blue Lights

Beko Active Fresh Blue Light™ technology ensures that the process of photosynthesis continues in the refrigerator prolonging the storage life of fresh fruit and vegetables while maintaining their natural flavours and nutritional elements.

LED Illumination

Chains of LED lights along the side walls illuminate every shelf separately and provide more efficient and homogeneous lighting of the unit.
