Bevelled Edge Finish

The entire outer edge of the hob is bevelled, bringing an appealing design finish to your kitchen surface.

Tempered Glass Surface

Constructed from an 8 mm sheet of tempered glass which provides stability, safety, strength, elegance and style to our range of gas on glass hobs.

High Powered Wok Burner

Perfect for cooking with broad-based pans and Wok pans it allows you to just use the low setting with small pans for simmering sauces or the entire burner power for intense high heat cooking.

Individual Cast Iron Trivets

The individual square-based trivets provide excellent stability for the pots. Thanks to their heavy duty construction, they are durable and long lasting.

Brass Burners

More efficient than regular burners, they provide improved gas flow and power use without increasing consumption.

Cast Iron Cradle

Essential for cooking with small pans or for using traditional coffee pots, this new cast iron cradle provides improved stability.

Steel Burner Housing

The steel burner housing keeps glass away from heat source and collects liquid due to accidental spills.
