## Dimensions

### Recommended minimum clearances

**Please note:** Doors are designed to sit proud of cabinetry (not flush).

If you have a cupboard above the refrigerator with a rear gap of less than 100mm (Y), recommended minimum clearance at the top of the refrigerator increases from 30mm to 70mm (X).

When positioned in a corner, the clearance must be at least 300mm on the hinge side to allow the door to open smoothly so that bins and shelves can be removed easily.
