## Built-in Oven, 60cm 55L, 9 Function

This Fisher & Paykel 60cm, 55L built-in oven with 9 functions is ideal for compact kitchens.

Brushed Stainless Steel

### Dimensions

Depth	565mm
Height	Ⓐ 458mm
Width	Ⓑ 597mm

### Features & Benefits

#### Cooking flexibility

This built-in oven has nine functions with pre-set temperatures, including Roast, Pastry Bake and Fan Forced allowing you to use a variety of cooking styles.

#### Sized to suit

This Fisher & Paykel compact built-in oven provides 55L of capacity. Our compact ovens are perfect for smaller kitchens and have all the features of a conventional built-in oven.

#### Easy cleaning

This built-in oven has catalytic liners that break down oil and fat splashes during cooking so you don't have to spend hours cleaning.

#### Safe and sound

The CoolTouch door with triple glazing and cooling system is safe to touch from the outside, protecting your hands and the surrounding cabinetry.

#### Perfect results

Our built-in ovens feature AeroTech - a technology that circulates heat evenly, ideal for multi-shelf cooking.

#### Designed to match

With their premium handle styling and stainless steel finish, our built-in ovens are designed to match the rest of Fisher & Paykel's kitchen appliance family.

#### Bake

The Bake function radiates heat from the top and bottom of the oven whilst natural convection currents evenly distribute heat. Moisture is retained to provide light, succulent dishes. For best results, only bake on one shelf at a time.

#### Classic Bake

Classic Bake generates heat from the bottom, ideal for slow cooking and gentle cooking of delicate recipes. There is no direct heating to the top of food so it's perfect for dishes that require minimal surface browning.

#### Fan Bake

Fan Bake generates heat at the top and bottom of the oven, with the fan creating airflow throughout. The increased airflow speeds up cooking so oven temperatures can be lowered by 20oC for most recipes. Ideal for baking biscuits, muffins and cakes.

#### Fan Forced

The Fan Forced function is great for multi-shelf cooking. Heat is generated at the rear of the oven and is distributed evenly throughout by the fan.

#### Fan Grill

The intense heat and radiation of the Fan Grill function works well for cooking large cuts of meats, so they are moist inside and crisp on the outside.

Grill

The Grill function delivers intense heat from the inner region of the top element when you need to quickly grill one or two portions. Perfect for cooking crispy chicken breast, steak and fish. The intensity can be finely controlled; ‘HI’ is ideal for quick surface browning.

Pastry Bake

The Pastry Bake function is similar to Classic Bake with the addition of a fan which circulates hot air around the cavity. It is ideal for recipes that need intense heat from the bottom but still require some heat on the top, such as pies and tarts.

Roast

Roast is a specialised function that combines the power of Grill with the long, slow heating ability of Bake. Your food receives 20 minutes of grill power before the oven automatically reverts to Bake at the desired temperature. This provides food with a crisp, flavoursome exterior and a succulent interior.

Warm

Warm is limited to very gentle temperatures. It isn’t intended as a cooking function but is designed to keep food warm and limit the progression of cooking. Using the oven’s specialised LO Warm setting takes the guesswork out of proving dough.

Specifications
