

90cm Premium Electric Oven

948 SXMP

ILVE's 90cm stainless steel oven is the heart of the new professional range, dimensioned and built to professional standards and requirements. ILVE have created an oven interior which is larger than that of other similar style ovens and features full internal grill system for large portions when grilling and baking. ILVE interior dimensions allow for several large roasts to be cooked at the same time and for those who like their meat tender, simply use the automatic ILVE roasting probe and set the temperature between 0°C–99°C and ILVE's micro processor will do the rest.

It will automatically switch off at exactly the temperature you program into the meat probe. Fast and accurate variable temperature adjustment between 0°C–250°C is one of the major advantages of the new large built in oven. With a super fast, hot air coil heating element around the hot air fan, the oven heats 0°C–180°C in a mere 8 minutes, which gives you a fast start for roasting a crisp golden roast on the outside before the lower setting sees to it that a tender moist middle is assured.
